Hi –I'm looking for Andrea or Mike ... or whoever the most appropriate person is:

I'm part of Amazon's press office looking for someone I can call on Monday, Labor Day, in the event of news coordination.

Thank you for your quick attention. I need to know who's the appropriate person to work with me on Monday and a commitment to answer the phone.

Thank you,
Lauren

To: [Fink, Carolee](#)
Cc: [Norvell, Wiley](#)
Subject: IMMEDIATE REQUEST: Quote
Date: Monday, September 04, 2017 2:22:30 PM
Attachments: [image001.png](#)

Carolee and Wiley,

Amazon wants to announce our Staten Island fulfillment center tomorrow morning before market open. The facility is bringing 2,200 jobs, most of which are the classic fulfillment center roles picking, packing and shipping customer orders. All roles are available however, so on top of the 2200, we're also hiring for engineers, technicians, HR and IT professionals and managers.

Following are the details in the release, and we would very much appreciate your help keeping quiet it until 9am tomorrow morning.

None of this would be possible without Mayor de Blasio and your team, so thank you for your quick attention to this request for a quote. Throughout the building and hiring process, I'll be reaching out again to coordinate any event or announcement your team deems valuable for this project such as a ground breaking, hiring events, grand opening, etc.

Call with any questions – and thanks for the quick turn.

Lauren

- Amazon's first fulfillment center in New York will create 2,200 f/t jobs
- Employees at the new Staten Island facility will work alongside Amazon Robotics
- Plans for a new 855,000-square-foot fulfillment center is Amazon's first in the state and will create more than 2,200 new, full-time jobs with opportunities for employees to engage with advanced robotics.
- UNAPPROVE DRAFT QUOTE: "We are excited to bring our first fulfillment center to New York and work alongside the state's incredible workforce," said Sanjay Shah, Amazon's Vice President of Customer Fulfillment. "The support of local leaders has been instrumental in our ability to come to New York, and we are grateful for the welcome we've received to bring thousands of new jobs with benefits starting on day one."
- Amazon employees at the Staten Island fulfillment center will pick, pack and ship customer items such as electronics, books and toys. The facility will feature innovative technology such as Amazon Robotics that will assist employees in fulfilling customer orders.
- The Staten Island project is being developed by Matrix Development Group.
- Full-time employees at Amazon receive competitive hourly wages and a comprehensive benefits package, including healthcare, 401(k) and company stock awards starting on day one. Amazon also offers regular full-time employees maternity and parental leave benefits and access to innovative programs like Career Choice, where it will pre-pay up to 95 percent of tuition for courses related to in-demand fields, regardless of whether the skills are relevant to a career at Amazon. Since the program's launch, more than 10,000 employees

have pursued degrees in game design and visual communications, nursing, IT programming and radiology, to name a few.

- To learn more about working at an Amazon fulfillment center, visit www.amazondelivers.jobs.

Margy

It's my distinct pleasure to connect you w Lannia Small and David Fischer. They are involved in multiple projects with the DOE/NYC Mayor's Office.

Specifically I wanted to put you in touch because they have connections with the Ladders for Leaders program that works w students 16-22.

They are great folks to work with- and would love to know more about your AWS initiatives.

I will let you all take it from here.

Aileen

Lannia and David,

AWS has some great support for students- can you let me know if folks from the Tech Talent Pipeline or Ladders Program would be interested in being in touch with Margy for more information about the program? I've already made some CUNY intros, but there are certainly other groups where this might be a great fit.

Thanks- not sure who the best points of contact are- I appreciate your help and suggestions

Aileen

Hi Aileen,

Thanks for being open to connect the AWS Educate team with CUNY!

Best,
Margy

Cloud computing competency is often noted as one of today's most sought after skills by employers. In fact, Cloud and Distributed Computing was noted as the #1 in demand skill by LinkedIn in 2016.

AWS Educate is Amazon's global initiative to give students the resources they need to learn cloud technology. It is a self-paced, no-cost curriculum designed to give students and veterans materials to accelerate cloud-related learning endeavors and your desired career path. More details on the student and institution benefits of AWS Educate are below. You can [sign up for AWS Educate here](#).

AWS is committed to creating a more inclusive tech ecosystem, not only in our own hiring, but also in training future tech leaders. Our campaign to build tech skills and networks among underrepresented communities is called [We Power Tech](#). If you would like to get more involved with We Power Tech and AWS Educate, including benefits such as opportunities to attend our Summits and re:Invent, please let me know.

Student Benefits

- Curated content (videos, white-papers, etc.) with the ability to select a personalized learning pathway and earn digital badges that showcase cloud skills
- Collaboration tools that give you the ability to store projects in one place and discover job postings where available
- Access to jobs by Amazon and **its** Partners where available
- Promotional AWS credits to start building projects on the AWS cloud platform

Jeff,

I am reaching out on behalf of Mayor Bill de Blasio to see when you are available for a scheduled call with the Mayor.

Please let me know if I should speak with someone else on your team.

Many thanks,

Prisca

Adam,

Below is a quote you can attribute to Mayor Bill de Blasio. We'd appreciate a chance to see in advance the release.

Best,
WN

"This is a big vote of confidence in New York City. We have the most talented workforce and the most diverse economy in the country, and the world's most innovative companies want to be put down roots and grow here. We are excited to see Amazon bringing thousands more high-paying jobs to its New York City offices and increasing its footprint on the West Side," said Mayor Bill de Blasio.

Mike, Carolee, Wiley –

Our legal counsel has reviewed the quote as part of our regular approval process. As you know, we announced the search for Amazon HQ2 on September 7th and any investment we make public during the evaluation phase should be extremely neutral and impartial. Therefore, our lawyers ask if we can use mayor de Blasio’s last part of the quote: “We are excited to see Amazon bringing thousands more high-paying jobs to its New York City offices and increasing its footprint on the West Side,” said Mayor Bill de Blasio.

Please, let me know if this approach works. Thank you.

Amazon to Create 2,000 Additional Jobs in New York City

Full-time positions include IT, finance, design and marketing professionals to support a wide range of businesses, including Amazon Web Services, Amazon Fashion and Amazon Advertising
– Candidates can apply here [\[link\]](#)

With the jobs it has already created in New York plus its recently announced Fulfillment Center in Staten Island, Amazon will have created close to 6,000 jobs across New York State by 2019

SEATTLE—September XX, 2017 (NASDAQ: AMZN)— Amazon today announced it plans to create more than 2,000 new jobs in New York City over the next three years and open a new office in Manhattan in 2018. Amazon already employs more than 1,800 people in Manhattan, and recently announced plans to hire 2,250 Operations employees in a new Fulfillment Center in Staten Island.

“Amazon’s decision to expand in New York City is proof positive that the strong economic climate of this state, and New York’s diverse workforce and talent, are helping to attract top-notch companies from around the world,” Governor Cuomo said. “New York welcomes Amazon’s latest investment and expansion in New York, as we support the growth of our strong business sector and continue to create quality, high-paying jobs in the Empire State.”

“We’re excited to expand our presence in New York – we have always found great talent here,” said Paul Kotas, Amazon’s Senior Vice President of Worldwide Advertising. “Last January we announced our plans to create 100,000 full-time, full-benefit jobs in the U.S. by mid-2018 – and we are on track to reach that goal.”

“New York City has the most talented workforce and the most diverse economy in the country, and the world’s most innovative companies want to be here. We are excited to see Amazon bringing thousands more high-paying jobs to its New York City offices and increasing its footprint on the West Side,” said Mayor Bill de Blasio.

“At the foundation of our city’s success are well-paying jobs in Manhattan’s transit-rich business districts,” said Manhattan Borough President Gale A. Brewer. “I’m pleased Amazon will be expanding in our newest commercial district, Hudson Yards, and welcome them to the neighborhood.”

At its new offices in Brookfield’s Manhattan West, Amazon will create a wide variety of roles – from software engineers and data analysts to economists. The offices will be the primary New York location for Amazon Advertising, with teams spanning, marketing, product, design, engineering and more.

Recruiting for these thousands of new positions has begun – interested candidates can apply [here](#). All of these positions come with the same benefits Amazon offers to all its full-time employees – whether most senior execs or hourly associates –a comprehensive benefits package, including healthcare, 401(k), and company stock awards, and [parental leave benefits](#). With more than 380,000 employees worldwide, Amazon ranks #1 on Fast Company’s Most Innovative Companies, #2 in Fortune’s World’s Most Admired Companies, #1 on The Harris Poll’s Corporate Reputation survey, and #2 on LinkedIn’s U.S. Top Companies list. Amazon was also recently included in the Military Times’ Best for Vets list of companies committed to providing opportunities for military veterans. To learn more about working at Amazon, click [here](#).

Amazon's new office will be located at 5 Manhattan West, where the company has secured more than 360,000 square feet of state-of-the-art working space. Amazon currently employs more than 1,800 people across different locations in the city – its Fashion Photo studio in Brooklyn, the newly opened Amazon Books stores or its Prime Now hub, from which the company offers One-Hour Delivery on thousands of items to Prime customers. Early this month Amazon announced plans for a new 855,000-square-foot Fulfillment Center in Staten Island, its first logistics facility in the state. This investment will create 2,250 new direct jobs with opportunities for employees to engage with advanced robotics.

Hi Kwasi,

Thank you for proving these options. Let's go with next week Monday at 4pm.

Best,
Lannia

Hi Margy and team,

Happy Friday!

We'd be happy to schedule a call to learn more. Can you share your availability for the next few weeks?

Best,
Lannia

Thanks for the intro, Aileen! (moving you to bcc, and adding in AWS Educate)

Hi Lannia and David,
So nice to e-meet you! I wanted to share with you some details on the [AWS Educate Program](#), which enables higher ed students to build skill in cloud computing. It is a free, online, self-paced program with 27 cloud career pathways, a job board, and curriculum for educators. Craig, Kwasi, and Dave (copied) lead our partnerships and can answer any questions about that.

I also wanted Jason Trego copied on this, since he is aware of the other work AWS is doing with the NYC Mayor's office.

Best regards,
Margy

Margy

It's my distinct pleasure to connect you w Lannia Small and David Fischer.
They are involved in multiple projects with the DOE/NYC Mayor's Office.

Specifically I wanted to put you in touch because they have connections with the Ladders for Leaders program that works w students 16-22.

They are great folks to work with- and would love to know more about your AWS initiatives.

I will let you all take it from here.

Aileen

Lannia and David,

AWS has some great support for students- can you let me know if folks from the Tech Talent Pipeline or Ladders Program would be interested in being in touch with Margy for more information about the program? I've already made some CUNY intros, but there are certainly other groups where this might be a great fit.

Thanks- not sure who the best points of contact are- I appreciate your help and suggestions

Aileen

Hi Aileen,

Thanks for being open to connect the AWS Educate team with CUNY!

Best,
Margy

Cloud computing competency is often noted as one of today's most sought after skills by employers. In fact, Cloud and Distributed Computing was noted as the #1 in demand skill by LinkedIn in 2016.

AWS Educate is Amazon's global initiative to give students the resources they need to learn cloud technology. It is a self-paced, no-cost curriculum designed to give students and veterans materials to accelerate cloud-related learning endeavors and your desired career path. More details on the student and institution benefits of AWS Educate are below. You can [sign up for AWS Educate here](#).

AWS is committed to creating a more inclusive tech ecosystem, not only in our own hiring, but also in training future tech leaders. Our campaign to build tech skills and networks among

underrepresented communities is called [We Power Tech](#). If you would like to get more involved with We Power Tech and AWS Educate, including benefits such as opportunities to attend our Summits and re:Invent, please let me know.

Student Benefits

- Curated content (videos, white-papers, etc.) with the ability to select a personalized learning pathway and earn digital badges that showcase cloud skills
- Collaboration tools that give you the ability to store projects in one place and discover job postings where available
- Access to jobs by Amazon and **its** Partners where available
- Promotional AWS credits to start building projects on the AWS cloud platform

OFFICE OF THE MAYOR
THE CITY OF NEW YORK

Proposed Amendments to the Senate Discussion Draft of the American Vision for Safer Transportation Through Advancement of Revolutionary Technologies (AV START) Act

SEC. 3 RELATIONSHIP TO OTHER LAWS

Section 3(a)

"(3) A state, territory, or political subdivision of a state may not enact or enforce a law, regulation, or other provision having the force and effect of law relating to any of the safety evaluation report subject areas described in section 9(b) of the American Vision for Safer Transportation through Advancement of Revolutionary Technologies Act **with respect to the design and construction** of a highly automated vehicle or automated driving system that is the subject of a report that complies with section 9(a) of such Act."

Reason: Adding "design and construction" to the preemption section elucidates and reinforces the Committee's intent to apply the existing preemption framework with respect to federal automotive standards to highly automated vehicles and automated driving systems and not go beyond the existing framework and maintain the existing authorities cities and states have with conventional vehicles.

SEC. 9 SAFETY EVALUATION REPORT

Section 9(b)(5)

(5) Nothing in subsection (4) may be construed as prohibiting NHTSA from enforcing its statutory and regulatory authority.

Reason: Adding the proposed language in paragraph 5 ensures that NHTSA's post market statutory and regulatory authority is not affected or limited by paragraph 4. Our understanding is that paragraph 4 reflects the Committee's intent to avoid a pre-market approval structure to highly automated vehicles or automated driving systems.

Section 9(b)(6)

(6) CAPABILITIES. - The capabilities and limitations of the highly automated vehicle or automated driving system.

Furthermore, a description under section (6) should include:

(A) The roadway assets required for the safe operation of a highly automated vehicle and automated vehicle systems in complex urban environments, including but not limited to: roadside equipment, pavement markings, signage,

OFFICE OF THE MAYOR
THE CITY OF NEW YORK

traffic signals, bike lanes, crosswalks and other relevant roadway assets as determined by the Secretary.

(B) How the automated vehicle will operate safely if the assets described in section 9(b)(6)(A) are obscured or concealed under any condition including, but not limited to adverse weather conditions such as rain, fog, ice, snow, sleet, hail, lightning or other conditions the Secretary determines is appropriate to address.

Reason: In order to plan effectively, cities need to know the infrastructure and roadway assets necessary for HAV's to function as intended and want to know how HAV's will handle those assets were obscured or concealed. This amendment will allow governments at all levels and law enforcement to understand the infrastructure needs for HAV's and work proactively with manufacturers and operators to implement necessary improvements.

Section 9(b)(8)

(8) COMPLIANCE WITH APPLICABLE LAWS. - The capability ***and adherence*** of the highly automated vehicle to applicable traffic laws and rules of the road.

(A) How manufacturers will prevent operators or passengers from instructing a highly automated vehicle or automated driving system to disregard traffic laws and regulations.

(B) How a highly automated vehicle or driving system will respond to law enforcement.

Reason: In order to guarantee safety, HAV's need to not just be *capable* of following traffic laws, but certify they will *adhere* to those laws. Additionally, manufacturers verifying that operators or passengers won't be able to program the HAV to disregard traffic laws and regulations is an important part of adhering to applicable laws.

Section 9(b)(9)

(A) The expected operational design domain in which the highly automated vehicle is designed to operate ***and how it will respond if that domain unexpectedly changes.***

Reason: The operational design domains that HAV's are programmed for and capable within may suddenly change for various reasons, including unexpected weather changes. It's important that HAV's be able to respond in a safe manner to these unexpected changes and manufacturers should describe how HAV's will respond.

Section 9(b)(10)

OFFICE OF THE MAYOR
THE CITY OF NEW YORK

CERTIFICATION OF INAPPLICABLE CATEGORIES. - A manufacturer that is solely testing a vehicle or system may certify that 1 or more of the categories set forth in paragraphs (1) through (9) do not apply.

A. The Secretary shall retain and use its authority to reject a manufacturer's certification that 1 or more of the categories set forth in paragraphs (1) through (9) do not apply to their vehicle or system testing. In such cases, the Secretary shall inform the manufacturer of its decision and give it 14 days to resubmit the report with the requested information."

DATA SHARING

Section 9(c)

In Section 9, re-designate subsections (d)-(f) as subsections (g)-(i) and insert the following after subsection (c):

(d) DATA TO BE COLLECTED - The Secretary shall require the following data to be collected from any manufacturer receiving a safety exemption under Title 49, Section 30113 (b)(3)(B) for an automated vehicle and is to be submitted to the data repository established in paragraph (1) of section 9(e):

1. Disengagement date and time, disengagement location, type of roadway, cause of disengagement, other parties involved in disengagement, weather conditions preceding disengagement, time required for manual takeover, traffic conditions, vehicle speed and outcome of disengagement;
2. Collisions per autonomous vehicle mile travelled, disengagements per autonomous vehicle mile travelled, vehicle level of automation, additional safety features employed;
3. Collision date and time, collision location, type of roadway, cause of collision, other parties involved in collision, weather conditions preceding collision;
4. Log of attempts to access on-board systems without authorization;
5. Origin and impacts of successful unauthorized access of on-board system with date and time info.
6. Requires the data collected under paragraphs 1-5 to be submitted on a weekly basis to the data repository created under section 9(e).

(e) DATA REPOSITORY-Not more than 90 days after the date of enactment, the Secretary shall issue regulations requiring the collection, publishing and updating periodically of the information listed in section 9(d) for each automated vehicle granted a safety exemption under Title 49, Section 30113 (b)(3)(B). These regulations should implement the following provisions:

OFFICE OF THE MAYOR
THE CITY OF NEW YORK

(1) THIRD PARTY-The Secretary shall utilize a repository managed by a third party to host or hold the data required to be collected under section 9(d). The Secretary shall contract with an appropriate third-party for this repository not more than 180 days after the date of enactment.

(2) REMOVAL OF PERSONALLY IDENTIFIABLE INFORMATION - The Secretary shall require the removal of any personally identifiable information from the data collected under section 9(d) and any other changes, including the aggregation of data, to preserve the anonymity of the drivers, vehicles, manufacturers, and operators, to the extent necessary.

(3) STATES, CITIES and LAW ENFORCEMENT ACCESSING REPOSITORY- Only the following entities shall have access to the repository; The Secretary, NHTSA, states, political subdivisions of a state, and law enforcement entities with jurisdiction over the geographic areas where an automated vehicle is testing, deployed or otherwise operating.

(f) COMMITTEE TO ADVISE SECRETARY ON DATA-In issuing the required regulations under section 9(d), the Secretary shall create a committee composed of representatives from states, local governments, academia, and law enforcement to make recommendations to the Secretary on the data that should be collected to improve safety and transportation planning.

(1) The committee created in section 9(f) shall annually report to the Secretary and the Secretary shall share the report with the entities mentioned in section 9(e)(3).

(2) Not later than 6 months thereafter, the Secretary shall issue regulations updating section 9(d) to add such data that complies with the recommendations referenced in the annual report in paragraph (1). The Secretary shall share the data with the entities mentioned in section 9(e)(3) to improve safety and transportation planning.

Reason: In the draft's current form, cities, states and law enforcement wouldn't receive any real-time or near real-time data about HAV operations and performance, hindering their ability to prepare. The purpose of this amendment is to increase the level of data manufacturers and operators are required to share with the Secretary and NHTSA and provide states, local governments and law enforcement the data they need to ensure the safety of their roadways, evaluate road and street design, and prepare their infrastructure and roadway assets for the deployment of HAV's. Additionally, the amendment seeks to ensure that **only states, local governments and law enforcement** with HAV's testing within their jurisdictions can obtain these data.

OFFICE OF THE MAYOR
THE CITY OF NEW YORK

Proposed Amendments to the Senate Discussion Draft of the American Vision for Safer Transportation Through Advancement of Revolutionary Technologies (AV START) Act

SEC. 3 RELATIONSHIP TO OTHER LAWS

Section 3(a)

"(3) A state, territory, or political subdivision of a state may not enact or enforce a law, regulation, or other provision having the force and effect of law relating to any of the safety evaluation report subject areas described in section 9(b) of the American Vision for Safer Transportation through Advancement of Revolutionary Technologies Act **with respect to the design and construction** of a highly automated vehicle or automated driving system that is the subject of a report that complies with section 9(a) of such Act."

Reason: Adding "design and construction" to the preemption section elucidates and reinforces the Committee's intent to apply the existing preemption framework with respect to federal automotive standards to highly automated vehicles and automated driving systems and not go beyond the existing framework and maintain the existing authorities cities and states have with conventional vehicles.

SEC. 9 SAFETY EVALUATION REPORT

Section 9(b)(5)

(5) Nothing in subsection (4) may be construed as prohibiting NHTSA from enforcing its statutory and regulatory authority.

Reason: Adding the proposed language in paragraph 5 ensures that NHTSA's post market statutory and regulatory authority is not affected or limited by paragraph 4. Our understanding is that paragraph 4 reflects the Committee's intent to avoid a pre-market approval structure to highly automated vehicles or automated driving systems.

Section 9(b)(6)

(6) CAPABILITIES. - The capabilities and limitations of the highly automated vehicle or automated driving system.

Furthermore, a description under section (6) should include:

(A) The roadway assets required for the safe operation of a highly automated vehicle and automated vehicle systems in complex urban environments, including but not limited to: roadside equipment, pavement markings, signage,

OFFICE OF THE MAYOR
THE CITY OF NEW YORK

traffic signals, bike lanes, crosswalks and other relevant roadway assets as determined by the Secretary.

(B) How the automated vehicle will operate safely if the assets described in section 9(b)(6)(A) are obscured or concealed under any condition including, but not limited to adverse weather conditions such as rain, fog, ice, snow, sleet, hail, lightning or other conditions the Secretary determines is appropriate to address.

Reason: In order to plan effectively, cities need to know the infrastructure and roadway assets necessary for HAV's to function as intended and want to know how HAV's will handle those assets were obscured or concealed. This amendment will allow governments at all levels and law enforcement to understand the infrastructure needs for HAV's and work proactively with manufacturers and operators to implement necessary improvements.

Section 9(b)(8)

(8) COMPLIANCE WITH APPLICABLE LAWS. - The capability ***and adherence*** of the highly automated vehicle to applicable traffic laws and rules of the road.

(A) How manufacturers will prevent operators or passengers from instructing a highly automated vehicle or automated driving system to disregard traffic laws and regulations.

(B) How a highly automated vehicle or driving system will respond to law enforcement.

Reason: In order to guarantee safety, HAV's need to not just be *capable* of following traffic laws, but certify they will *adhere* to those laws. Additionally, manufacturers verifying that operators or passengers won't be able to program the HAV to disregard traffic laws and regulations is an important part of adhering to applicable laws.

Section 9(b)(9)

(A) The expected operational design domain in which the highly automated vehicle is designed to operate ***and how it will respond if that domain unexpectedly changes.***

Reason: The operational design domains that HAV's are programmed for and capable within may suddenly change for various reasons, including unexpected weather changes. It's important that HAV's be able to respond in a safe manner to these unexpected changes and manufacturers should describe how HAV's will respond.

Section 9(b)(10)

OFFICE OF THE MAYOR
THE CITY OF NEW YORK

CERTIFICATION OF INAPPLICABLE CATEGORIES. - A manufacturer that is solely testing a vehicle or system may certify that 1 or more of the categories set forth in paragraphs (1) through (9) do not apply.

A. The Secretary shall retain and use its authority to reject a manufacturer's certification that 1 or more of the categories set forth in paragraphs (1) through (9) do not apply to their vehicle or system testing. In such cases, the Secretary shall inform the manufacturer of its decision and give it 14 days to resubmit the report with the requested information."

DATA SHARING

Section 9(c)

In Section 9, re-designate subsections (d)-(f) as subsections (g)-(i) and insert the following after subsection (c):

(d) DATA TO BE COLLECTED - The Secretary shall require the following data to be collected from any manufacturer receiving a safety exemption under Title 49, Section 30113 (b)(3)(B) for an automated vehicle and is to be submitted to the data repository established in paragraph (1) of section 9(e):

1. Disengagement date and time, disengagement location, type of roadway, cause of disengagement, other parties involved in disengagement, weather conditions preceding disengagement, time required for manual takeover, traffic conditions, vehicle speed and outcome of disengagement;
2. Collisions per autonomous vehicle mile travelled, disengagements per autonomous vehicle mile travelled, vehicle level of automation, additional safety features employed;
3. Collision date and time, collision location, type of roadway, cause of collision, other parties involved in collision, weather conditions preceding collision;
4. Log of attempts to access on-board systems without authorization;
5. Origin and impacts of successful unauthorized access of on-board system with date and time info.
6. Requires the data collected under paragraphs 1-5 to be submitted on a weekly basis to the data repository created under section 9(e).

(e) DATA REPOSITORY-Not more than 90 days after the date of enactment, the Secretary shall issue regulations requiring the collection, publishing and updating periodically of the information listed in section 9(d) for each automated vehicle granted a safety exemption under Title 49, Section 30113 (b)(3)(B). These regulations should implement the following provisions:

OFFICE OF THE MAYOR
THE CITY OF NEW YORK

(1) THIRD PARTY-The Secretary shall utilize a repository managed by a third party to host or hold the data required to be collected under section 9(d). The Secretary shall contract with an appropriate third-party for this repository not more than 180 days after the date of enactment.

(2) REMOVAL OF PERSONALLY IDENTIFIABLE INFORMATION - The Secretary shall require the removal of any personally identifiable information from the data collected under section 9(d) and any other changes, including the aggregation of data, to preserve the anonymity of the drivers, vehicles, manufacturers, and operators, to the extent necessary.

(3) STATES, CITIES and LAW ENFORCEMENT ACCESSING REPOSITORY- Only the following entities shall have access to the repository; The Secretary, NHTSA, states, political subdivisions of a state, and law enforcement entities with jurisdiction over the geographic areas where an automated vehicle is testing, deployed or otherwise operating.

(f) COMMITTEE TO ADVISE SECRETARY ON DATA-In issuing the required regulations under section 9(d), the Secretary shall create a committee composed of representatives from states, local governments, academia, and law enforcement to make recommendations to the Secretary on the data that should be collected to improve safety and transportation planning.

(1) The committee created in section 9(f) shall annually report to the Secretary and the Secretary shall share the report with the entities mentioned in section 9(e)(3).

(2) Not later than 6 months thereafter, the Secretary shall issue regulations updating section 9(d) to add such data that complies with the recommendations referenced in the annual report in paragraph (1). The Secretary shall share the data with the entities mentioned in section 9(e)(3) to improve safety and transportation planning.

Reason: In the draft's current form, cities, states and law enforcement wouldn't receive any real-time or near real-time data about HAV operations and performance, hindering their ability to prepare. The purpose of this amendment is to increase the level of data manufacturers and operators are required to share with the Secretary and NHTSA and provide states, local governments and law enforcement the data they need to ensure the safety of their roadways, evaluate road and street design, and prepare their infrastructure and roadway assets for the deployment of HAV's. Additionally, the amendment seeks to ensure that **only states, local governments and law enforcement** with HAV's testing within their jurisdictions can obtain these data.

Good Day All:

Initially this was to be a teleconference; since that time we have confirmed in-person. To minimize confusion I have since recently forwarded a meeting invite inclusive of meeting location and dial-in details for anyone unavailable to attend in-person. I do hope this helps to clarify; please feel free to reach out if you have any questions.

Thanks.

Hello all,

We inquired if Gary can call in, while he is available at noon, he will not be able to make this in person on 10/3. Please let me know if this works.

Thanks,
Jade

Thanks for the intro, Aileen! (moving you to bcc, and adding in AWS Educate)

Hi Lannia and David,
So nice to e-meet you! I wanted to share with you some details on the [AWS Educate Program](#), which enables higher ed students to build skill in cloud computing. It is a free, online, self-paced program with 27 cloud career pathways, a job board, and curriculum for educators. Craig, Kwasi, and Dave (copied) lead our partnerships and can answer any questions about that.

I also wanted Jason Trego copied on this, since he is aware of the other work AWS is doing with the NYC Mayor's office.

Best regards,
Margy

Margy

It's my distinct pleasure to connect you w Lannia Small and David Fischer.
They are involved in multiple projects with the DOE/NYC Mayor's Office.

Specifically I wanted to put you in touch because they have connections with the Ladders for Leaders program that works w students 16-22.

They are great folks to work with- and would love to know more about your AWS initiatives.

I will let you all take it from here.

Aileen

Lannia and David,

AWS has some great support for students- can you let me know if folks from the Tech Talent Pipeline or Ladders Program would be interested in being in touch with Margy for more information about the program? I've already made some CUNY intros, but there are certainly other groups where this might be a great fit.

Thanks- not sure who the best points of contact are- I appreciate your help and suggestions

Aileen

To: Aileen Gemma Smith <aileen@vizalytics.com>

Hi Aileen,

Thanks for being open to connect the AWS Educate team with CUNY!

Best,
Margy

Cloud computing competency is often noted as one of today's most sought after skills by employers. In fact, Cloud and Distributed Computing was noted as the #1 in demand skill by LinkedIn in 2016.

AWS Educate is Amazon's global initiative to give students the resources they need to learn cloud technology. It is a self-paced, no-cost curriculum designed to give students and veterans materials to accelerate cloud-related learning endeavors and your desired career path. More details on the student and institution benefits of AWS Educate are below. You can [sign up for AWS Educate here](#).

AWS is committed to creating a more inclusive tech ecosystem, not only in our own hiring, but also in training future tech leaders. Our campaign to build tech skills and networks among underrepresented communities is called [We Power Tech](#). If you would like to get more involved with We Power Tech and AWS Educate, including benefits such as opportunities to attend our Summits and re:Invent, please let me know.

Student Benefits

- Curated content (videos, white-papers, etc.) with the ability to select a personalized learning pathway and earn digital badges that showcase cloud skills
- Collaboration tools that give you the ability to store projects in one place and discover job postings where available
- Access to jobs by Amazon and **its** Partners where available
- Promotional AWS credits to start building projects on the AWS cloud platform

**AWS Account ID – set to be optional

**Grade level - select Graduate

**Graduation Year (current degree program): verify set to 2018

**Graduation Month (current degree program) verify set to 12

-In Step 3. and 4 - follow the instructions that are shown to complete the process.

STEP 5: After you complete these steps, you will get an email indicating that your application is under review. Email gkitzmil@amazon.com or kwasiasa@amazon.com letting us know that you have applied.

After approval, you will receive a second email with links to create your password and login to the Student portal. Note that this will provide you with an account in our production instance.

If you forget your password in the future, you can click the “forgot password” link on the login page to reset.

Thanks for the intro, Aileen! (moving you to bcc, and adding in AWS Educate)

Hi Lannia and David,
So nice to e-meet you! I wanted to share with you some details on the [AWS Educate Program](#), which enables higher ed students to build skill in cloud computing. It is a free, online, self-paced program with 27 cloud career pathways, a job board, and curriculum for educators. Craig, Kwasi, and Dave (copied) lead our partnerships and can answer any questions about that.

I also wanted Jason Trego copied on this, since he is aware of the other work AWS is doing with the NYC Mayor's office.

Best regards,
Margy

Margy

It's my distinct pleasure to connect you w Lannia Small and David Fischer.
They are involved in multiple projects with the DOE/NYC Mayor's Office.

Specifically I wanted to put you in touch because they have connections with the Ladders for Leaders program that works w students 16-22.

They are great folks to work with- and would love to know more about your AWS initiatives.

I will let you all take it from here.

Aileen

Hi Aileen,

Thanks for being open to connect the AWS Educate team with CUNY!

Best,
Margy

Cloud computing competency is often noted as one of today's most sought after skills by employers. In fact, Cloud and Distributed Computing was noted as the #1 in demand skill by LinkedIn in 2016.

AWS Educate is Amazon's global initiative to give students the resources they need to learn cloud technology. It is a self-paced, no-cost curriculum designed to give students and veterans materials to accelerate cloud-related learning endeavors and your desired career path. More details on the student and institution benefits of AWS Educate are below. You can [sign up for AWS Educate here](#).

AWS is committed to creating a more inclusive tech ecosystem, not only in our own hiring, but also in training future tech leaders. Our campaign to build tech skills and networks among underrepresented communities is called [We Power Tech](#). If you would like to get more involved with We Power Tech and AWS Educate, including benefits such as opportunities to attend our Summits and re:Invent, please let me know.

Student Benefits

- Curated content (videos, white-papers, etc.) with the ability to select a personalized learning pathway and earn digital badges that showcase cloud skills
- Collaboration tools that give you the ability to store projects in one place and discover job postings where available
- Access to jobs by Amazon and **its** Partners where available
- Promotional AWS credits to start building projects on the AWS cloud platform

Subject: Checking-In (JobsPlus Update)

Margy/Hannah,

I hope this email finds you both doing well. I am writing to update you on our city process for moving forward with the workforce networking around JobsPlus. The good news is that the City is very interested in moving forward with this initiative, but they want to include it in a larger bid for hosting the new Amazon HQ. My partners at NYC Economic Development Corporation (EDC) have asked if you would be willing to speak with them about Amazon's K-12, post-secondary and retraining agenda. I did my best to relay our conversations, but I could not answer the more nuanced questions. Do either of you have time to connect with my colleague, Ana Arino, Chief Strategy Officer for EDC? This will be really helpful in accelerating our timeline for development. I truly appreciate your support.

Subject: Amazon Web Services Technical Essentials Training Course - October 17th - AWS NYC Pop Up Loft
Date: Wednesday, October 11, 2017 11:33:46 AM
Attachments: [image002.png](#)

All,

I wanted to invite you to a free 1 day AWS Technical Essentials Training Course being held in NYC at the AWS Pop Up Loft on October 17th from 10 am to 5 pm for folks interested from the City of New York. This course is a tremendous opportunity to learn more about AWS with your peers from across the city. The course description and outline are below. Please register early as space is limited.

If you have any questions please don't hesitate to reach out.

AWS Technical Essentials

Day

Link to Register: -

<https://www.aws.training/UserPreferences/Registration?token=S689CUEQRUW8NMT...>

Description

AWS Technical Essentials introduces you to AWS products, services, and common solutions. It provides you with fundamentals to become more proficient in identifying AWS services so that you can make informed decisions about IT solutions based on your business requirements and get started working on AWS.

Course Objectives

This discussion teaches you how to:

- Recognize terminology and concepts as they relate to the AWS platform and navigate the AWS Management Console.
- Understand the foundational services, including Amazon Elastic Compute Cloud (EC2), Amazon Virtual Private Cloud (VPC), Amazon Simple Storage Service (S3), and Amazon Elastic Block Store (EBS).
- Understand the security measures AWS provides and key concepts of AWS Identity and Access Management (IAM).
- Understand AWS database services, including Amazon DynamoDB and Amazon Relational Database Service (RDS).
- Understand AWS management tools, including Auto Scaling, Amazon CloudWatch, Elastic Load Balancing (ELB), and AWS Trusted Advisor.

Intended Audience

This Lecture day is held for large audiences (50 – 200 individuals) and intended for

- Individuals responsible for articulating the technical benefits of AWS services to customers
- Individuals interested in learning how to get started with using AWS
- SysOps administrators, Solution Architects and developers interested in using AWS services

Course Outline

This course covers the following concepts:

- Introduction and History of AWS
- AWS Foundational Services: EC2, VPC, S3, EBS
- AWS Security, Identity, and Access Management: IAM
- AWS Databases: RDS, DynamoDB
- AWS Management Tools: Auto Scaling, CloudWatch, Elastic Load Balancing, Trusted Advisor

Hi Jen,

A few weeks ago we had explored some avenues to enable NYC to provide diapers to young

parents in need. We would like to continue that discussion from a business and technology standpoint.

Out of this meeting, we would like to have a better sense of Amazon's capabilities that may help enable the program, refine the solution (see below) we initial envisioned, and also, discuss the partnership, and potential contribution from Amazon.

Please forward this invite as needed.

Best,

Rod

A potential solution with Amazon:

- * Parent fills out an application.
 - Via a survey / workflow tool.
- * DOE reviews application and update the application status.
 - Via survey / workflow tool.
 - DOE system automatically generates a recurring order.
- * Amazon delivers diapers to locker.
- * Amazon delivers locker code to DOE.
- * DOE disclose the code to parent.
 - Code can be automatically emailed or texted.
 - Or simply printed out and handed to the parent.

Hi Cyrus,

How are you? Both Dave and I met you earlier this year on that fabulous tour you hosted for Amazon. Dave leads the AWS Educate program in K12, focusing on cloud education for K12 and beyond. I head up marketing for AWS in the K12 space, but have less to do with anything actually pertaining to training and/or education. Nonetheless, it would probably be beneficial for the three of us to get on the phone and we could provide you with information about our work and how we plan to grow in FY18.

Can you send me some times that work for you to talk next week? I can set-up a meeting for the three of us.

Thanks!

To: "Shatzen, Hannah" <shatzenh@amazon.com>, "Elliott, Margy" <margelli@amazon.com>
Subject: Checking-In (JobsPlus Update)

Margy/Hannah,

I hope this email finds you both doing well. I am writing to update you on our city process for moving forward with the workforce networking around JobsPlus. The good news is that the City is very interested in moving forward with this initiative, but they want to include it in a larger bid for hosting the new Amazon HQ. My partners at NYC Economic Development Corporation (EDC) have asked if you would be willing to speak with them about Amazon's K-12, post-secondary and retraining agenda. I did my best to relay our conversations, but I could not answer the more

nuanced questions. Do either of you have time to connect with my colleague, Ana Arino, Chief Strategy Officer for EDC? This will be really helpful in accelerating our timeline for development. I truly appreciate your support.

Best Regards,
W. Cyrus Garrett
Executive Director
NYC Young Men's Initiative
Office of the Mayor
ODM-Strategic Policy Initiatives
ymi@cityhall.nyc.gov

For scheduling requests, please cc Jahvaris Fulton: jfulton@cityhall.nyc.gov

Subject: AWS Technical Essentials Training - October 17th - REGISTRATION REQUIRED
Date: Friday, October 13, 2017 10:47:17 AM
Attachments: [image001.png](#)
Importance: High

All,

I wanted to reach out and make sure that you register at the link below for this AWS Technical Essentials Training as this is the only way we can track attendance and completion of the course. Please let me know if you have any questions. Thanks

1. Go to the AWS Training and Certification Portal. Use this link:
- [October 17: AWS Technical Essentials Day](#)
2. Click "Sign In" on the top right corner.
3. Create a new account or sign in using an existing Amazon account. This includes credentials for your **Amazon retail account, AWS account, or any account that uses the "Login and Pay with Amazon" widget (such as Woot or Zappos).**
4. Complete your account profile if you are signing in for the first time.

Jason Trego
Enterprise Sales Executive – WWPS SLG NY/NJ

Dear Thomas Garcia,

Congratulations – you have successfully created your AWS Training and Certification account. Be sure to bookmark <https://www.aws.training>. Come back often to find new and updated training to help you learn about working with AWS.

What's Inside

- **Find Training for Your Role:** Whether you are new to AWS or looking to deepen your technical skills, we offer a variety of training resources to help you. Find recommended training for your role.
- **AWS Certification:** Prepare for exams and track your progress.

Contact Us

If you have a question or would like to share your feedback, please [contact us](#).

Thank you,
AWS Training and Certification

Subject: RE: Amazon Business- Intro call

Hello Jonnell,

My name is Jen Kelleher and I'm with Amazon Business. I have been working with Benita on a citywide project. I wanted to reach out and see if you would be interested in having a quick conversation about how we can partner to work with NYC MWBE suppliers in the Amazon marketplace.

- **Amazon Business** is a new marketplace that lives on top of Amazon.com -- combining the selection, convenience and value that customers have come to know and love from Amazon.com, with new features and unique benefits that address the needs of business and public sector agencies.
- **M/WBE suppliers in NY:** Amazon Business has tens of thousands of sellers on the AB marketplace, many of which have self-identified with one or more quality or diversity ownership credentials. Customers can refine their product search to include offers based on different seller criteria, including minority-owned, women-owned, veteran-owned and small business.

Let me know if you have a 15 minute slot open on Monday Oct 23rd for us to set up a quick call.

Subject: AWS Database Week at the AWS NYC Pop Up Loft
Date: Monday, October 16, 2017 4:44:58 PM
Attachments: [image001.png](#)
[image003.png](#)

All,

I wanted to provide you with an exciting opportunity to learn more about AWS and a variety of database and data warehouse options on AWS at the AWS NYC Pop Up Loft. If interested please register asap as the courses are filling very quickly and will be full by the end of this week at the latest.

Below are the agenda for each day and link to register. Please let me know if you have any questions or want more details. Thank you.

AWS NYC Pop Up Loft Registration

<https://pages.awscloud.com/amer-nyc-Database-October-2017-RegistrationPage.html>

Database Week at the AWS Loft is an opportunity for prospects and customers to learn about Amazon's rapidly expanding family of managed database services. These services provide easy, scalable, reliable, and cost-effective ways to manage structured data in the cloud. We explain the fundamentals and take a technical deep dive into Amazon RDS and Amazon Aurora for relational databases, Amazon DynamoDB for NoSQL databases, Amazon Redshift for data warehouses, Amazon ElastiCache for managed Redis service, along with options for database migration, analytics, caching, and more. Customers and prospects will learn how to get started, how to support their applications, and how to scale.

Agenda

Data Warehousing and Data Lakes | Tuesday, October 24 | 10:00AM-5:30PM

9:30AM-10:00AM | Check-In

10:00AM-11:00AM | Getting Started with Amazon Redshift: Traditional data warehouses become expensive and slow down as the volume of your data grows. Amazon Redshift is a fast, petabyte-scale data warehouse that makes it easy to analyze all of your data using existing business intelligence tools for 1/10th the traditional cost. This session will provide an introduction to Amazon Redshift and cover the essentials you need to deploy your data warehouse in the cloud so that you can achieve faster analytics and save costs. We'll also cover the recently announced Redshift Spectrum, which allows you to query unstructured data directly from Amazon S3. Level: 200

11:00AM-12:00PM | Best Practices for Migrating your Data Warehouse to Amazon Redshift: You can gain substantially more business insights and save costs by migrating your existing data warehouse to Amazon Redshift. This session will cover the key benefits of migrating to Amazon Redshift, migration strategies, and tools and resources that can help you in the process. We'll learn about AWS Database Migration Service and AWS Schema Migration Tool, which were recently enhanced to import data from six common data warehouse platforms. Level: 200

12:00PM-1:00PM | Lunch (will be provided)

1:00PM-2:00PM | Deep Dive on Amazon Redshift: Analyzing big data quickly and efficiently requires a data warehouse optimized to handle and scale for large datasets. Amazon Redshift is a fast, petabyte-scale data warehouse that makes it simple and cost-effective to analyze big data for a fraction of the cost of traditional data warehouses. In this session, we take an in-depth look at data warehousing with Amazon Redshift for big data analytics. We cover best practices to take advantage of Amazon Redshift's columnar technology and parallel processing capabilities to deliver high throughput and query performance. We also discuss how to design optimal schemas, load data efficiently, and use work load management. Level: 300

2:00PM-3:00PM | Streaming Data Analytics with Amazon Redshift and Kinesis Firehose: Evolving your analytics from batch processing to real-time processing can have a major business impact, but ingesting streaming data into your data warehouse requires building complex streaming data pipelines. Amazon Kinesis Firehose solves this problem by making it easy to transform and load streaming data into Amazon Redshift so that you can use existing analytics and business intelligence tools to extract information in near real-time and respond promptly. In this session, we will dive deep using Amazon Kinesis Firehose to load streaming data into Amazon Redshift reliably, scalable, and cost-effectively. Level: 200

3:00PM-3:15PM | Break

3:15PM-5:30PM | Hands-on Lab: Amazon Redshift: This self-paced lab enables you to test-drive Amazon Redshift and gain practical experience working with it. In this lab, you will learn how to configure and deploy a Redshift cluster, loading data into it, and query your data using an external SQL client. Level: 200

Non-Relational Databases | Wednesday, October 25 | 10:00AM-7:30PM

9:30AM-10:00AM | Check-In

10:00AM-11:30AM | Deep Dive on Amazon DynamoDB: Explore Amazon DynamoDB capabilities and benefits in detail and learn how to get the most out of your DynamoDB database. We go over best practices for schema design with DynamoDB across multiple use cases, including gaming, IoT, and others. We explore designing efficient indexes, scanning, and querying, and go into detail on a number of recently released features, including DynamoDB Accelerator (DAX), DynamoDB Time-to-Live, and more. We also provide lessons learned from operating DynamoDB at scale, including provisioning DynamoDB for IoT. Level: 200

11:30AM-12:30PM | DynamoDB Design Workshop: Following the DynamoDB Deep Dive session, this workshop is a design session (no computer needed) in which we will work through several real world DynamoDB use cases. For each one, we will go over the requirements, propose and analyze possible solutions and their pros and cons, with an eye for performance efficiency, scalability, and cost optimization. Level: 300

12:30PM-1:30PM | Lunch (will be provided)

1:30PM-3:00PM | Unleash the Power of Redis with Amazon ElastiCache: Redis has exploded in popularity to become the de-facto standard for in-memory key-value store used by customers for fast data storage to accelerate databases and applications. In this talk, we will discuss how to leverage Redis to achieve blazing fast performance in a variety of use cases – from database caching, to messaging, queuing, IoT and more. Both high-level architecture considerations and implementation (with code snippets) will be covered. We will also see how using Amazon ElastiCache makes it easy to power your Redis workloads in a robust, secure and fully managed way. Level: 200 (requires understanding of database services)

3:00PM-5:00PM | Hands-on Lab: Amazon ElastiCache: In-memory services such as Amazon ElastiCache for Redis provide tools to accelerate application and database performance. In this lab, you will gain hands-on experience with ElastiCache for Redis by creating an Amazon ElastiCache Redis node and connect to it from an Amazon EC2 instance to run commands. You will then clean up your resources by deleting the stack. By the end of this lab, you will be able to create an Amazon ElastiCache cluster, authorize access to your Amazon ElastiCache cluster, connect to your Amazon ElastiCache cluster and run commands and delete an Amazon ElastiCache cluster. Level: 200

5:30PM-7:30PM | Customer Appreciation Event: Amazon ElastiCache: Join us for an evening of fun at the ElastiCache for Redis customer appreciation event, where customers, attendees and AWS associates come together to connect and learn about the latest advancements in in-memory caching for database and application acceleration. While there, have a drink, hear about new ElastiCache for Redis features, get answers from our expert AWS engineers and connect with product leaders. Level: 100

Relational Databases | Thursday, October 26 | 10:00AM-5:30PM

9:30AM-10:00AM | Check-In

10:00AM-11:00AM | Introduction to Amazon Relational Database Service: Amazon RDS allows you to launch an optimally configured, secure and highly available database with just a few clicks. It provides cost-efficient and resizable capacity while managing time-consuming database administration tasks, freeing you to focus on your applications and business. We'll discuss Amazon RDS fundamentals, learn about the seven available database engines, and examine customer success stories. Level 100

11:00AM-12:00PM | What's New in Amazon Aurora: Amazon Aurora is a MySQL- and PostgreSQL-compatible database engine that combines the speed and availability of high-end commercial databases with the simplicity and cost-effectiveness of open source databases. In this deep dive session, we'll discuss best practices and explore new features in areas like high availability, security, performance management and database cloning. Level 300

12:00PM-1:00PM | Lunch (will be provided)

1:00PM-1:30PM | Reducing Database Costs via Shard Consolidation: Scaling a database eventually brings you to the limits of your database engine's capabilities. Many database users solve this with sharding, but that adds a new layer of management complexity. In this session, we'll see how a single, scalable Amazon Aurora database can consolidate multiple shards in a scalable, cost-effective way. We'll see a demo of a sharded system migration to Aurora using AWS Database Migration Service. Level: 200

1:30PM-2:00PM | Migrating to Amazon RDS with Database Migration Service: Database migration doesn't need to be difficult or time-consuming. Learn how AWS Database Migration Service provides an easy, secure migration from on-premises and Amazon EC2 environments to Amazon RDS, Amazon Redshift, Amazon DynamoDB and EC2 databases, with minimal-downtime. We'll also see how the AWS Schema Conversion Tool automatically converts your schema and a majority of the custom code, so you can get up and running in the cloud quickly and inexpensively. We'll discuss alternative data migration strategies for special use cases. Level 200

2:00PM-3:00 PM | What's New in Amazon RDS for Open-Source and Commercial Databases: In the past year, Amazon RDS has continued to expand functionality, scalability, availability and ease of use for all supported database engines: PostgreSQL, MySQL, MariaDB, Oracle and Microsoft SQL Server. We'll take a close look at RDS use cases and new capabilities, splitting the time between open-source and commercial database engines. Level 300

3:00PM-3:15PM | Break

3:15PM-5:30PM | Hands-on Lab: Amazon Aurora and AWS Database Migration Service: This guided lab will give you hands-on experience with Amazon Aurora and AWS Database Migration Service. You will go through the basic steps to create an Amazon Aurora instance and connect to it. You will also use AWS Database Migration Service to migrate a MySQL Database instance on Amazon EC2 to Amazon Aurora. Level 200

Data with Search | Friday, October 27 | 10:00AM-4:00PM

9:30AM-10:00AM | Check-In

10:00AM-11:00AM | Introduction to Amazon Elasticsearch Service: Elasticsearch is the most popular open-source search and analytics engine - it's easy to use, but not always easy to configure and manage. Learn about Amazon's fully managed service that provides easier deployment, operation, and scale for Elasticsearch. Level: 200

11:00AM-12:00PM | Adding Search to Relational Databases: SQL is a powerful tool to query data, but it doesn't cover everything you might need. Sometimes, the precision of SQL is a limitation, that can be overcome by using the flexibility and inherent ranking of search. Learn how to use AWS services to create fully managed solutions using Amazon Aurora and Amazon Elasticsearch Service to combine the power of query and search. Level: 200

12:00PM-1:00PM | Lunch (will be provided)

1:00PM-2:00PM | Adding Search to Amazon DynamoDB: DynamoDB queries enable consistent low latency at any workload, using the partition key, sort key, local secondary indexes, and global secondary indexes. Amazon Elasticsearch Service enables flexible search, including ranking and aggregation. Adding Elasticsearch to DynamoDB opens new capabilities to combine the power of query and search. Learn how Amazon.com uses this combination and how you can use it, too. Level: 200

2:00PM-4:00 PM | Hands-on Lab: Microservices for Search and Query Build a flexible infrastructure that includes Amazon databases and search. Level: 200

3:15PM-5:30PM | Hands-on Lab: Amazon Aurora and AWS Database Migration Service: This guided lab will give you hands-on experience with Amazon Aurora and AWS Database Migration Service. You will go through the basic steps to create an Amazon Aurora instance and connect to it. You will also use AWS Database Migration Service to migrate a MySQL Database instance on Amazon EC2 to Amazon Aurora. Level 200

Data with Search | Friday, October 27 | 10:00AM-4:00PM

9:30AM-10:00AM | Check-In

10:00AM-11:00AM | Introduction to Amazon Elasticsearch Service: Elasticsearch is the most popular open-source search and analytics engine - it's easy to use, but not always easy to configure and manage. Learn about Amazon's fully managed service that provides easier deployment, operation, and scale for Elasticsearch. Level: 200

11:00AM-12:00PM | Adding Search to Relational Databases: SQL is a powerful tool to query data, but it doesn't cover everything you might need. Sometimes, the precision of SQL is a limitation, that can be overcome by using the flexibility and inherent ranking of search. Learn how to use AWS services to create fully managed solutions using Amazon Aurora and Amazon Elasticsearch Service to combine the power of query and search. Level: 200

12:00PM-1:00PM | Lunch (will be provided)

1:00PM-2:00PM | Adding Search to Amazon DynamoDB: DynamoDB queries enable consistent low latency at any workload, using the partition key, sort key, local secondary indexes, and global secondary indexes. Amazon Elasticsearch Service enables flexible search, including ranking and aggregation. Adding Elasticsearch to DynamoDB opens new capabilities to combine the power of query and search. Learn how Amazon.com uses this combination and how you can use it, too. Level: 200

2:00PM-4:00 PM | Hands-on Lab: Microservices for Search and Query Build a flexible infrastructure that includes Amazon databases and search. Level: 200

Date: Monday, October 16, 2017 5:25:39 PM
Attachments: [invite.ics](#)

Dear Thomas Garcia,

Thank you for registering for AWS Technical Essentials Day. Please review the following information to help you prepare for class. To view or modify your registration, visit your [Transcript](#).

Class Details

Name: AWS Technical Essentials Day
Location: 350 W Broadway, New York, NY 10013, USA
Start Date: 17 Oct 2017
Start Time: 10:00 AM
End Date: 17 Oct 2017
End Time: 05:00 PM

Note: The start and end times above are listed in the class's local time zone.

Class starts promptly at 10:00 AM and ends at 05:00 PM. Please plan to arrive 15 minutes prior to the start of class to ensure you are ready to start on time.

Additional Class Notes

Prepare for Class

Please review the following information prior to arriving at class:

Hi Jahvaris

No problem rescheduling the call. Just let us know what dates you're looking at and we'll work to coordinate on our side.

Looking forward to the conversation.

Thanks,
Dave

All,

Thank you so much for spending time at the AWS Loft to take the AWS Technical Essentials Training course. We hope that you got a good general understanding of some of the technical aspects of the AWS platform and some of the AWS services.

As follow up, we have included the S3 link to a document, below, which contains a lot of information related to AWS. We have attached several “**AWS Training Roadmaps**” which will walk you through the additional recommended training tracks depending on which area of expertise you are interested in.

These roadmaps contain both free, near free, and paid training options that can lead to being able to pass the AWS Certification Test. We would encourage you to continue your training and education on AWS.

If you have any questions related to AWS as you move forward, please don't hesitate to reach out.

AWS Training: DevOps Engineering Track for Developers

The DevOps Engineer Track is designed to take a developer or software engineer with no AWS experience through to AWS DevOps Engineer - professional certification. It requires a combination of self-study, formal training, lab completion, and project work and assignment in collaboration with management. It is structured in a way so that an individual may commence or stop working through the learning program at the appropriate point for them, based on their previous experience and current or desired certification level.

Time for completion:

It's estimated that approximately 10 days per person over 12 months will need to be allowed for completing the entire DevOps track. This does not include time allocated to project work.

Pricing - Private Onsite Training

Course	Price per 10 PAX	Additional Student Price	No. courses in this track
One Day Courses			1
Three Day Courses			2

Pricing - Public Training

Course	Price per person	No. courses in this track
One Day Courses		1
Three Day Courses		2

Other Costs:

You will need a Qw klab account to complete this track. Each person will need access to approximately 140 lab credits from Qwiklabs each. A single lab credit costs approximately USD 1.

Exams:

Practice Exam Registration fee is USD 20

AWS Certified Developer – Associate Exam Registration fee is USD 150

AWS Certified DevOps Engineer – Professional Exam Registration fee is USD 300

Phase 1

1-2 Months

Course/Learning Activity	Type
<p>Self-Explore: AWS Fundamentals - NEW to AWS</p> <p>An Introduction to AWS Video: What is Cloud Computing? (3 minutes) A short introduction to Cloud Computing.</p> <p>Whitepaper: Overview of Amazon Web Services An overview of the advantages and benefits of cloud computing.</p> <p>Video: AWS Chicago Summit 2016 Keynote (1h 24m, but the first 20 minutes gives a good overview of AWS) An overview of the AWS ecosystem with customer case studies. Watch as much or as little as you choose.</p> <p>“Introduction to...” Videos These videos provide a brief overview of popular services. Watch them to identify which services you’d like to explore further:</p> <ul style="list-style-type: none">• Compute: Introduction to Amazon EC2 (4 minutes)• Storage: Introduction to Amazon S3 (3 minutes)• Data Archiving: Introduction to Amazon Glacier (3 minutes)• Development: Introduction to AWS Elastic Beanstalk (3 minutes)• Deployment: Introduction to AWS CloudFormation (3 minutes)• Serverless Computing: Introduction to AWS Lambda (3 minutes)• Database: Introduction to Amazon RDS (3 minutes)• Data Warehouse: Introduction to Amazon Redshift (3 minutes)• Big Data: Introduction to Amazon Elastic MapReduce (3 minutes)• Streaming Data Capture: Introduction to Amazon Kinesis (2 minutes)• Identity and Access Management: Introduction to AWS IAM (2 minutes) <p>Introductory Hands-On Labs</p> <p>These hands-on labs are short introductions to popular AWS services. The labs provide access to the live AWS service, plus step-by-step instructions. They are an excellent way to gain initial hands-on experience with AWS services. Search the lab catalogue at Qwiklabs for each of the following labs:</p> <p>Hands-On Lab (1 Credit): Introduction to Amazon Elastic Compute Cloud (EC2) This lab walks you through the steps to launch and configure a virtual machine in the Amazon cloud. You will practice using Amazon Machine Images to launch Amazon EC2 Instances and use key pairs for SSH authentication to log into to your instance.</p> <p>Hands-On Lab (FREE): Introduction to Amazon Simple Storage Service (S3) This lab demonstrates how to use an Amazon S3 bucket and manage files, or object, that are stored in the bucket. You will practice how to create a bucket, add an object, view an object, move an object, and delete an object and bucket in the AWS Management Console.</p> <p>Hands-On Lab (1 Credit): Introduction to Elastic Load Balancing This lab takes you through how to automatically distribute incoming web traffic across multiple Amazon EC2 instances by using Elastic Load Balancing. We walk you through the process to create a basic load balancer, configure health checks, assign security groups, and review settings for your Elastic Load Balancer.</p>	<p>Self-Explore – 4 hours</p> <p>To be completed prior to attendance at AWS Technical Essentials</p>

Self-Explore: AWS Fundamentals for Developers

Documentation: [SDKs for Amazon Web Services](#)

This index highlights the primary SDKs, IDE Toolkits, and Command Line Tools for developing and managing your AWS applications.

Video from AWS re:Invent Conference 2014: [Developer Tools & SDKs](#) (40 minutes each)

A series of videos focusing on developing applications that take advantage of AWS, including SDKs, the AWS command-line interface and automating the software delivery pipeline.

Hands-On Lab (10 credits): [Programming Amazon DynamoDB with .NET](#)

This lab will provide a further understanding of using the AWS Toolkit for .NET and leveraging Amazon DynamoDB for application development. It will demonstrate the basic steps required to install Visual Studio Community Edition and the AWS Toolkit for Visual Studio and to build an application in C# that leverages DynamoDB using the AWS SDK for .NET. To successfully complete this lab, you should be familiar with Visual Studio for C# and have a basic knowledge of launching and connecting to Windows systems in AWS.

Hands-On Lab (10 credits): [Deploy a Java EE App on AWS Elastic Beanstalk Using Docker Containers](#)

This lab demonstrates how to install a Java EE application into JBoss Wildfly, running in a custom Docker Container and then deploy your container to AWS Elastic Beanstalk.

Course/Learning Activity	Type
AWS Security Fundamentals (FREE) This self-paced course is designed to introduce you to fundamental cloud computing and AWS security concepts including AWS access control and management, governance, logging, and encryption methods. It also covers security-related compliance protocols and risk management strategies, as well as procedures related to auditing your AWS security infrastructure.	Online 4 hours

Enrol on Instructor Led Training:

AWS Technical Essentials Learn the foundations of cloud computing, storage, and networking on AWS in this one-day course for anyone who wants to get started using AWS.	Classroom 1 day
--	-----------------

Phase 2

2-4 Months

Self-explore: prepare for Developer Training: Whitepaper: Introduction to DevOps on AWS Businesses must become increasingly agile as innovation accelerates and customer needs rapidly evolve. Time to market is key, so IT departments need to be agile to facilitate overall business goals. The evolution of DevOps helps provide and support this agility. This paper focuses on DevOps principles and practices supported on the AWS platform. Whitepaper: Introduction to DevOps on AWS Businesses must become increasingly agile as innovation accelerates and customer needs rapidly evolve. Time to market is key, so IT departments need to be agile to facilitate overall business goals. The evolution of DevOps helps provide and support this agility. This paper focuses on DevOps principles and practices supported on the AWS platform.	1 hour
--	--------

Enrol on Instructor Led Training:

[Developing on AWS](#)

Developing on AWS helps developers understand how to use the AWS SDK to develop secure and scalable cloud applications. The course provides in-depth knowledge about how to interact with AWS using code and covers key concepts, best practices, and troubleshooting tips.

Classroom –
3 days

Phase 3

4-7 Months – certification and project work

Prepare for AWS Certified Developer Associate Exam –

Step 1: Attend the Developing on AWS course

Step 2: Review the Exam Guide and Sample Questions

See the concepts covered on the exam to get a blueprint of what you need to study. [View the AWS Certified Developer - Associate Exam Guide.](#)

STUDY TIP: Don't skip the sample questions.

[Exam sample questions](#) help you check your knowledge and pinpoint concepts and areas requiring more study.

Step 3: Practice with Self-Paced Labs and an Exam Prep Quest

Complete the [Developer - Associate EXAM PREP Quest \(79 Credits\)](#):

This quest is designed to help you get hands-on practice with several key services which are addressed in the AWS Certified Developer – Associate exam blueprint. Practice fundamental and advanced concepts for working with Amazon Simple Storage Service, AWS IAM, Amazon DynamoDB, Amazon API Gateway, AWS Lambda, AWS Elastic Beanstalk, AWS Security Token Service, Amazon CloudFront and Auto Scaling.

Step 4: Study AWS Whitepapers

Broaden your technical understanding with whitepapers written by the AWS team, independent analysts, and AWS partners.

STUDY TIP: Focus on the following whitepapers.

[Architecting for the AWS Cloud: Best Practices](#) || [AWS Security Best Practices](#) || [Amazon Web Services: Overview of Security Processes](#) || [Cloud Architectures](#) || [Development and Test on AWS](#) || [Backup and Recovery Approaches Using AWS](#) || [Amazon Virtual Private Cloud Connectivity Options](#) || [How AWS Pricing Work](#)

Step 5: Review AWS FAQs

Browse our list to familiarize yourself with commonly raised questions and issues.

[View All FAQs](#)

STUDY TIP: Focus on the following FAQs:

Amazon EC2 || Amazon S3 || Amazon VPC || Amazon Route 53 || Amazon RDS || Amazon SQS

Step 6: Take a Practice Exam

Test your knowledge online in a timed environment.

Practice exams are delivered through our testing partner. Click [here](#) to create your account.

Step 7: Schedule Your Exam and Get Certified

Exams are delivered through our testing partner. Click [here](#) to create your account.

Preparation and
exam - 2 days

Project assignment:

Schedule a time to meet with your manager to be assigned to an appropriate project where you can put your knowledge to work.

Agree length of project time with Manager

Phase 4

7-12 Months

DevOps Engineering

Course/Learning Activity	Type
<p>Self-explore: prepare for DevOps Engineering Training:</p> <p>Website: AWS – What is DevOps? DevOps is the combination of cultural philosophies, practices, and tools that increases an organization's ability to deliver applications and services at high velocity: evolving and improving products at a faster pace than organizations using traditional software development and infrastructure management processes. This speed enables organizations to better serve their customers and compete more effectively in the market.</p> <p>Whitepaper: Introduction to DevOps on AWS As innovation accelerates and customer needs rapidly evolve, businesses must become increasingly agile. Time to market is key, and to facilitate overall business goals, IT departments need to be agile. Over the years software development lifecycles moved from waterfall to agile models of development. These improvements are moving downstream toward IT operations with the evolution of DevOps.</p> <p>Hands-On Lab: (1 Credit) Introduction to AWS CodeDeploy This lab teaches you about AWS CodeDeploy and walks you through how to create, launch, and test a deployment using AWS CodeDeploy.</p> <p>Take the knowledge Check – are you ready for DevOps Engineering on AWS Training?</p> <p>If you're not ready yet – explore the Qwiklabs platform to help bridge any knowledge gaps before attending the training</p>	<p>Self-Explore – 2 hours</p> <p>To be completed prior to attendance at DevOps Engineering on AWS Training</p>

Enrol on Instructor Led Training:

<p>DevOps Engineering on AWS DevOps Engineering on AWS demonstrates how to use the most common DevOps patterns to develop, deploy, and maintain applications on AWS. The course covers the core principles of the DevOps methodology and examines a number of use cases applicable to startup, small and medium-sized business, and enterprise development scenarios.</p>	<p>Classroom – 3 days</p>
--	---------------------------

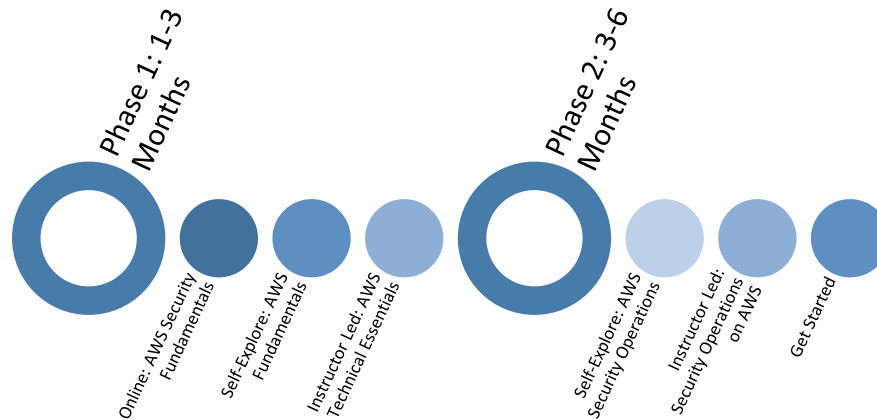

Project assignment:

<p>Set up a sand-box and practice Review all materials and labs above, including resources provided in instructor-led training, and read/complete the below labs:</p> <p>Schedule a time to meet with your manager to be assigned to an appropriate DevOps project where you can put your knowledge to work.</p>	<p>Agree length of project time with Manager</p>
--	--

Certification:

<p>Exam Prep for AWS Certified DevOps Engineer – Professional</p> <p>Whitepaper: Overview of Deployment Options on AWS</p> <p>AWS provides number of options for provisioning of infrastructure and deployment of applications. Each service has a unique approach for managing application deployments and offers various strategies for updating your application. This whitepaper is intended for anyone looking for information on different deployment options in AWS. It lays out common features available in deployment services (such as AWS Elastic Beanstalk, AWS CloudFormation, AWS OpsWorks and AWS CodeDeploy), articulates strategies for updating application stacks, and presents few examples of hybrid deployment models for complex workloads.</p> <p>Hands-On Lab (15 credits): Blue/Green Deployment Pattern with AWS Elastic Beanstalk</p> <p>In this lab you will learn how to deploy a simple web application continuously using the Elastic Beanstalk Command Line Interface (EB CLI) in two ways, Rolling Deployment and Blue/Green Deployment. The lab also demonstrates many interesting command line tools to interact with, monitor, scale, and ssh into your running Elastic Beanstalk deployment completely from the command line.</p> <p>Hands-On Lab (10 credits): Working with AWS CloudFormation</p> <p>This lab will demonstrate how to work with AWS CloudFormation, which are JSON templates that define the AWS resources, and any associated dependencies or runtime parameters required to run your application. You can use the templates to quickly deploy your defined environment to AWS.</p> <p>Hands-On Lab (10 credits): Automating AWS Services with Scripting and the AWS CLI</p> <p>This lab demonstrates how to access and manage AWS services in three ways: through the AWS Management Console, the AWS Command Line Interface (CLI), and the AWS Software Development Kit (SDK). You will use one or more of these three options to access Amazon S3, Amazon EBS, Amazon EC2 and Amazon CloudWatch.</p> <ul style="list-style-type: none">• Download sample questions• Read the exam guide• Take a practice exam	<p>Self-Explore – 2 hours</p>
<p>Book your exam & get certified!</p> <p>AWS Certified DevOps Engineer Professional exam validates technical expertise in provisioning, operating, and managing distributed application systems on the AWS platform.</p>	<p>3 hours - certification exam</p>

AWS Training: Security Track

The Security is designed to provide enablement support to build technical expertise in the area of security in AWS as it pertains to design, implementation, and troubleshooting - primarily for people who are in a Security Specialist role. The track is structured in a way so that an individual may start or stop working through the learning program at the appropriate point for them, based on their previous experience and current or desired certification level. The track requires a combination of self-study, formal training, exam and lab completion, and project work in collaboration with management.

Time for completion:

It's estimated that approximately 5-6 days per person over 3-6 months will need to be allowed for completing the Security Track. This does not include time allocated to project work.

Pricing - Private Onsite Training

Course	Price per 10 PAX	Additional Student Price	No. courses in this track
One Day Courses			1
Three Day Courses			1

Pricing - Public Training

Course	Price per person	No. courses in this track
One Day Courses		1
Three Day Courses		1

Other Costs:

You will need a Qw klab account to complete this track. Each person will need access to approximately 3 lab credits from Qw klabs each. A single lab credit costs approximately USD 1.

Exams:

Practice Exam Registration fee is USD 20

AWS Certified Solutions Architect - Associate Exam Registration fee is USD 150

AWS Certified Security – Specialty (Beta) Exam Registration Fee: \$150 USD (Includes Beta exam discount. Exam normally priced at \$300 USD.)

Phase 1

1-3 Months

Course/Learning Activity	Type

AWS Training: Systems Operations Track

The Operations Track is designed to provide enablement support to build technical expertise in deployment, management, and operations on the AWS platform - primarily for people who are in a Systems Administrator or Developer Operations role. It includes recommendations for associate level certification preparation. The track is structured in a way so that an individual may start or stop working through the learning program at the appropriate point for them, based on their previous experience and current or desired certification level. The track requires a combination of self-study, formal training, lab completion, and project work in collaboration with management.

Time for completion:

It's estimated that approximately 5-6 days per person over 6-12 months will need to be allowed for completing the Operations Track. This does not include time allocated to project work.

Pricing - Private Onsite Training

Course	Price per 10 PAX	Additional Student Price	No. courses in this track
One Day Courses			1
Three Day Courses			1

Pricing - Public Training

Course	Price per person	No. courses in this track
One Day Courses		1
Three Day Courses		1

Other Costs:

You will need a Qw klab account to complete this track. Each person will need access to approximately 110 lab credits from Qwiklabs each. A single lab credit costs approximately USD 1.

Exams:

Practice Exam Registration fee is USD 20

AWS Certified SysOps Administrator – Associate Exam Registration fee is USD 150

Phase 1

1-3 Months

Course/Learning Activity	Type
<p>Self-Explore: AWS Fundamentals - NEW to AWS</p> <p>An Introduction to AWS Video: What is Cloud Computing? (3 minutes) A short introduction to Cloud Computing.</p> <p>Whitepaper: Overview of Amazon Web Services An overview of the advantages and benefits of cloud computing.</p> <p>Video: AWS Chicago Summit 2016 Keynote (1h 24m, but the first 20 minutes gives a good overview of AWS) An overview of the AWS ecosystem with customer case studies. Watch as much or as little as you choose.</p> <p>"Introduction to..." Videos These videos provide a brief overview of popular services. Watch them to identify which services you'd like to explore further:</p> <ul style="list-style-type: none">• Compute: Introduction to Amazon EC2 (4 minutes)• Storage: Introduction to Amazon S3 (3 minutes)• Data Archiving: Introduction to Amazon Glacier (3 minutes)• Development: Introduction to AWS Elastic Beanstalk (3 minutes)• Deployment: Introduction to AWS CloudFormation (3 minutes)• Serverless Computing: Introduction to AWS Lambda (3 minutes)• Database: Introduction to Amazon RDS (3 minutes)• Data Warehouse: Introduction to Amazon Redshift (3 minutes)• Big Data: Introduction to Amazon Elastic MapReduce (3 minutes)• Streaming Data Capture: Introduction to Amazon Kinesis (2 minutes)• Identity and Access Management: Introduction to AWS IAM (2 minutes) <p>Introductory Hands-On Labs</p> <p>These hands-on labs are short introductions to popular AWS services. The labs provide access to the live AWS service, plus step-by-step instructions. They are an excellent way to gain initial hands-on experience with AWS services. Search the lab catalogue at Qwiklabs for each of the following labs:</p> <p>Hands-On Lab (1 Credit): Introduction to Amazon Elastic Compute Cloud (EC2) This lab walks you through the steps to launch and configure a virtual machine in the Amazon cloud. You will practice using Amazon Machine Images to launch Amazon EC2 Instances and use key pairs for SSH authentication to log into to your instance.</p> <p>Hands-On Lab (FREE): Introduction to Amazon Simple Storage Service (S3) This lab demonstrates how to use an Amazon S3 bucket and manage files, or object, that are stored in the bucket. You will practice how to create a bucket, add an object, view an object, move an object, and delete an object and bucket in the AWS Management Console.</p> <p>Hands-On Lab (1 Credit): Introduction to Elastic Load Balancing This lab takes you through how to automatically distribute incoming web traffic across multiple Amazon EC2 instances by using Elastic Load Balancing. We walk you through the process to create a basic load balancer, configure health checks, assign security groups, and review settings for your Elastic Load Balancer.</p>	<p>Self-Explore – 4 hours</p> <p>To be completed prior to attendance at AWS Technical Essentials</p>

Course/Learning Activity	Type
AWS Security Fundamentals (FREE) This self-paced course is designed to introduce you to fundamental cloud computing and AWS security concepts including AWS access control and management, governance, logging, and encryption methods. It also covers security-related compliance protocols and risk management strategies, as well as procedures related to auditing your AWS security infrastructure.	Online 4 hours

AWS Technical Essentials Learn the foundations of cloud computing, storage, and networking on AWS in this one-day course for anyone who wants to get started using AWS.	Classroom 1 day
--	-----------------

Phase 2

3-6 Months

Course/Learning Activity	Type
Self-explore in preparation for Systems Operations Training Whitepaper: Overview of Deployment Options on AWS AWS provides number of options for provisioning of infrastructure and deployment of applications. Each service has a unique approach for managing application deployments and offers various strategies for updating your application. This whitepaper is intended for anyone looking for information on different deployment options in AWS. It lays out common features available in deployment services (such as AWS Elastic Beanstalk, AWS CloudFormation, AWS OpsWorks and AWS CodeDeploy), articulates strategies for updating application stacks, and presents few examples of hybrid deployment models for complex workloads Whitepaper: ITIL Asset and Configuration Management in the Cloud Cloud initiatives require more than just the right technology. They also must be supported by organizational changes, such as people and process changes. This paper is intended for IT service management (ITSM) professionals who are supporting a hybrid cloud environment that leverages AWS. It outlines best practices for asset and configuration management, a key area in the IT Infrastructure Library (ITIL), on the AWS cloud platform. Hands-On Lab (10 credits): Working with AWS CloudFormation This lab will demonstrate how to work with AWS CloudFormation, which are JSON templates that define the AWS resources, and any associated dependencies or runtime parameters required to run your application. You can use the templates to quickly deploy your defined environment to AWS. Hands-On Lab (10 credits): Automating AWS Services with Scripting and the AWS CLI This lab demonstrates how to access and manage AWS services in three ways: through the AWS Management Console, the AWS Command Line Interface (CLI), and the AWS Software Development Kit (SDK). You will use one or more of these three options to access Amazon S3, Amazon EBS, Amazon EC2 and Amazon CloudWatch. Hands-On Lab (1 Credit): Introduction to AWS Elastic Beanstalk This lab teaches you about AWS Elastic Beanstalk and leads you through the steps to launch an application using Elastic Beanstalk in the AWS Management Console. Hands-On Lab (1 Credit): Introduction to AWS CodeDeploy This lab teaches you about AWS CodeDeploy and walks you through how to create, launch, and test a deployment using AWS CodeDeploy.	Self-Explore – 2hrs To be completed prior to attendance at Systems Operations training

AWS Training: Big Data Track

The AWS Big Data Track is a learning plan designed to introduce cloud-based big data solutions such as Amazon Elastic MapReduce (EMR), Amazon Redshift, Amazon Kinesis and the rest of the AWS big data platform - primarily for people who are in a Solutions Architect role or Data Scientists and Data Analysts interested in learning about big data solutions on AWS. The track is structured in a way so that an individual may start or stop working through the learning plan at the appropriate point for them, based on their previous experience and current or desired certification level. The track requires a combination of self-study, formal training and lab completion.

Time for completion:

It's estimated that approximately 6-10 days per person over 4-8 months will need to be allowed for completing the Big Data Track.

Pricing - Private Onsite Training

Course	Price per 10 PAX	Additional Student Price	No. courses in this track

Big Data self-explore

Course/Learning Activity	Type
<p>What is Big Data?</p> <p>Big data can be described in terms of data management challenges that – due to increasing volume, velocity and variety of data – cannot be solved with traditional databases. While there are plenty of definitions for big data, most of them include the concept of what’s commonly known as “three V’s” of big data:</p> <p>Volume: Ranges from terabytes to petabytes of data</p> <p>Variety: Includes data from a wide range of sources and formats (e.g. web logs, social media interactions, ecommerce and online transactions, financial transactions, etc)</p> <p>Velocity: Increasingly, businesses have stringent requirements from the time data is generated, to the time actionable insights are delivered to the users. Therefore, data needs to be collected, stored, processed, and analyzed within relatively short windows – ranging from daily to real-time</p> <p>Watch Intro to Big Data (2:48) clip.</p> <p>Report: 451 Research: Using the cloud to maximize the value of big data</p> <p>Many organizations are already leveraging the cloud to build and deploy big data applications. A new report from 451 Research shows the cloud can help a broad range of organizations get measurable value from big data. In this report, The Cloud-Based Approach to Achieving Business Value from Big Data, researchers take an in-depth look into six organizations and their cloud-based big data adoption efforts. The study identified 5 fundamental ways organizations are getting value from big data using the cloud.</p> <p>Report: 451 Research: Using the cloud to maximize the value of big data</p> <p>Many organizations are already leveraging the cloud to build and deploy big data applications. A new report from 451 Research shows the cloud can help a broad range of organizations get measurable value from big data. In this report, The Cloud-Based Approach to Achieving Business Value from Big Data, researchers take an in-depth look into six organizations and their cloud-based big data adoption efforts. The study identified 5 fundamental ways organizations are getting value from big data using the cloud.</p> <p>Take an AWS Big Data Test Drive</p> <p>Test Drives are developed by AWS Partner Network (APN) Consulting and Technology partners and are provided free of charge for education, demonstration, and evaluation purposes. Each Test Drive includes enough free AWS server time to launch and explore these live solution stacks. You can return to Test Drives and try any or all of the Test Drives at any time, so feel free to experiment, explore, and learn.</p> <p>Read these Whitepapers:</p> <p>Big Data Analytics Options on AWS</p> <p>Comparing the Use of DynamoDB and Apache HBase for NoSQL</p> <p>Amazon Kinesis and Apache Storm Building a Real-Time Sliding-Window Dashboard over Streaming Data</p>	<p>Self-Explore – 3hrs</p> <p>To be completed prior to attendance</p>

Enrol on formal Training

<p>* Optional *</p> <p>Attend if you would like more of a deep dive into AWS technology and/or to better understand Architecting in AWS. Architecting on AWS</p> <p>Architecting on AWS covers the fundamentals of building IT infrastructure on AWS. The course is designed to teach solutions architects how to optimize the use of the AWS Cloud by understanding AWS services and how these services fit into cloud-based solutions.</p>	Classroom – 3 days
---	--------------------

Phase 3:

4-8 Months

Specialist Training: Big Data

Online Training

<p>Online Training course (free, 3 hours): Big Data Technology Fundamentals</p> <p>This web-based course helps you build a foundation for working with AWS services for big data solutions. It covers the development of big data solutions using the Hadoop ecosystem, including MapReduce, HDFS, and the Pig and Hive programming frameworks. This course is offered at no charge, and can be used on its own or to help you prepare for the Big Data on AWS instructor-led course.</p>	3 hours, online
--	-----------------

Self-Explore

Course/Learning Activity	Type
<p>Introduction to AWS Big Data solutions</p> <p>Hands-On Lab (1 credit): Introduction to Amazon Elastic MapReduce (EMR)</p> <p>This lab will walk you through how to launch an Amazon Elastic MapReduce (EMR) cluster using the AWS Management Console and run a job to split and count words in an input file.</p> <p>Hands-On Lab (free): Introduction to Amazon Redshift</p> <p>The lab will give you the basic understanding of Amazon Redshift data warehouse service. It will demonstrate the basic steps required to get started with Redshift: creating a cluster, loading data and performing queries against that data.</p>	<p>Self-Explore – 5 hours</p> <p>To be completed prior to attendance</p>

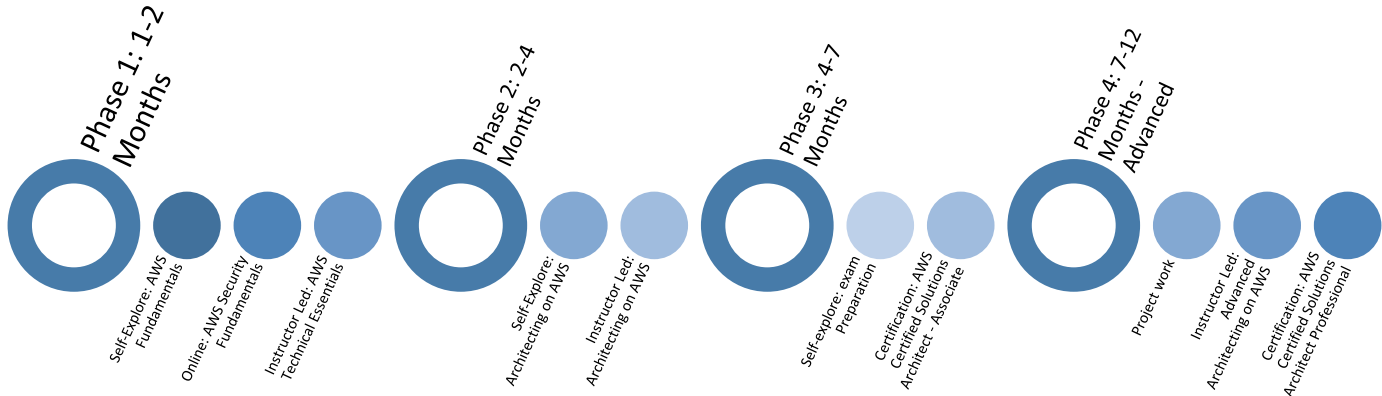

Enrol on formal Training

<p>Big Data on AWS</p> <p>Big Data on AWS introduces you to cloud-based big data solutions such as Amazon Elastic MapReduce (EMR), Amazon Redshift, Amazon Kinesis and the rest of the AWS big data platform. In this course, we show you how to use Amazon EMR to process data using the broad ecosystem of Hadoop tools like Hive and Hue. We also teach you how to create big data environments, work with Amazon DynamoDB, Amazon Redshift, and Amazon Kinesis, and leverage best practices to design big data environments for security and cost-effectiveness.</p>	3 day, classroom course

AWS Training Architecting Track

The Architecting Track is an accelerated track designed to provide enablement support to build advanced technical expertise in designing and deploying scalable, highly available, and fault tolerant systems on AWS - primarily for people who are in a Solutions Architect or Solution Design Engineer role. The track is structured in a way so that an individual may start or stop working through the learning program at the appropriate point for them, based on their previous experience and current or desired certification level. The track requires a combination of self-study, formal training, exam and lab completion, and project work in collaboration with management.

Time for completion:

It's estimated that approximately 10 days per person over 6-12 months will need to be allowed for completing the Architecting Track. This does not include time allocated to project work.

Pricing - Private Onsite Training

Course	Price per 10 PAX	Additional Student Price	No. courses in this track
One Day Courses			1
Three Day Courses			2

Pricing - Public Training

Course/Learning Activity	Type
Self-explore in preparation for Architecting on AWS training Whitepaper: Operational Checklists for AWS This paper is targeted at developers and architects who are looking for operational and architectural guidance from AWS to help assess their application's operational readiness. It provides two checklists - Basic and Enterprise - so that you can evaluate your applications against a list of essential and recommended best practices and deploy them with confidence. Whitepaper: Architecting for the AWS Cloud: Best Practices This whitepaper paper provides prescriptive guidance to cloud architects so that they can build highly scalable and elastic applications optimized to run in AWS cloud. It discusses cloud concepts and highlights various design patterns and best practices. Whitepaper: AWS Well-Architected Framework The Well-Architected Framework enables you to assess and improve your cloud-based architectures to better understand the business impact of your design decisions. This paper addresses general design principles, as well as specific best practices and guidance in four conceptual areas (security, reliability, performance efficiency, and cost optimization). These four areas are defined as the pillars of the Well-Architected Framework. The framework provides a set of questions that allow you to assess an existing, or proposed architecture, and also provides a set of AWS best practices for each pillar. Using this framework in your architecture will help you produce more stable and efficient systems.	Self-Explore – 2hrs To be completed prior to attendance at Architecting on AWS training

Hi Jason,

Thank you to you and your team for coming to City Hall to talk about your services. Michaela Mercado from the Department of Health, who is on this chain, will connect you to the Mental Health Innovation Lab team.

Thanks,
Albert

Importance: High

All,

Thank you for the time on Tuesday to discuss the Thrive NYC program and AWS. I have included information below that we discussed in our meeting and please let me know if you have any questions. We would love to connect directly with the Innovation Lab team as I think there are a number of areas that we could assist the team with around analytics, social media integration, mobile development, and research.

Please let me know if you have any follow up questions or want to schedule some additional time to connect. Also please forward to anyone else that I might have missed on the email.

Hi,

I wanted to invite you to our 1 Day AWS Innovate Conference which will touch on many of the major business and technical questions that agencies have in regards to using and leveraging AWS and cloud services. This event is designed for NYC government employees and some of the AWS leadership team will be in attendance as well. The registration link is below which contains the agenda. Please don't hesitate to register as space is limited and will fill up quickly.

Registration page

Please let me know if you have any questions and hope to see everyone at the conference

Subject: AWS Innovate NYC: learn how the cloud helps solve your biggest challenges
Date: Tuesday, November 28, 2017 8:58:31 AM

AWSDear Karen,

State and local governments are leading the way in the drive to innovate for and with citizens. Whether through open data initiatives, public safety modernization, education reform, citizen service improvements or infrastructure programs, more and more local governments are turning to Amazon Web Services to provide the cost-effective, scalable, secure and flexible infrastructure necessary to make a difference.

Join AWS for a day of informative sessions about how the cloud brings unrealized benefits to government agencies. [Register Here.](#)

Topics to be covered include:

- **Why AWS** - How State and Local Governments are embracing the cloud for innovation
- **Solving Problems with AWS** - How government agencies use the cloud to problem solve for mission-critical issues
- **Achieving Business Value with AWS** - How the cloud brings security, agility, and productivity while achieving cost savings.
- **Succeeding with AWS**- Customer presentation
- **Technology Showcase** - an introduction to cloud technology
- **AWS Cloud Migration** - How to move with minimal disruption, cost, and time
- **Big Data and Analytics** - Creating a measurable data driven culture that focuses on results
- **Partner Spotlight** - How AWS enables innovative government solutions.

Click the [registration link](#) to access the full schedule and register for the event.

Regards,

A complimentary breakfast and lunch will be provided during the event. You should consult with an appropriate ethics or procurement official to determine whether you are permitted to attend. By RSVP'ing, you certify that your attendance (1) is neither prohibited by nor inconsistent with any applicable laws, regulations, binding orders, or applicable ethics or procurement rules, (2) will not create a conflict of interest for AWS, and (3) will not conflict AWS from participating in the any on-going procurements.

New York State and Local Sales and Use Tax

Exempt Organization Certification ST-119.1

This certification is not valid unless all entries have been completed. (5/95)

Name of seller Amazon LLC	Name of exempt organization making purchases City of New York, Office of the Mayor
Mailing Address 440 Terry Avenue North	Exempt organization number (from Form ST-119) [REDACTED]
City, Village or Post Office Seattle	Mailing Address 100 Gold Street, 2nd floor
State WA	City, Village or Post Office New York
Zip Code 98109	State New York
Substantial civil and/or criminal penalties will result from the misuse of this form.	Zip Code 10038
I certify that the organization named above holds a valid Form ST-119, <i>Exempt Organization Certificate</i> , and is exempt from state and local sales and compensating use taxes on its purchases.	
Print or Type name of officer of organization Rachel Lauter	Title Dep. chief of staff
Signature 	Date Prepared

Instructions

Seller

All entries have been completed and an officer of the organization has signed the certification, you may accept it to exempt sales to the organization named. The exempt organization must be the direct purchaser and payer of record. Any bill, invoice or receipt you provide must show the organization as the purchaser. Payment must be from the funds of the exempt organization.

Do not accept this form to exempt sales of motor fuel or diesel motor fuel, including No. 2 heating oil (see Purchaser section).

The exempt organization must give you certification at the time of the organization's first purchase. A separate document is not necessary for each subsequent purchase, provided that the exempt organization's name, address, and certificate number appear on the sales slip or billing invoice. The certification is considered part of each order and remains in force unless revoked. If a certification with all entries completed is not received within 90 days after the delivery of the property or service, you will share with the purchaser the burden of proving the sale was exempt.

You must keep this *Exempt Organization Certification* for at least three years after the date of the last exempt sale substantiated by the certification.

Purchaser

Complete this certification and give it to the seller. This form may be reproduced without prior permission from the Tax Department.

Your exemption from New York State and local sales and use tax does not extend to officers, members or employees of the exempt organization. Personal purchases made by these individuals are subject to sales and use tax. An organization's exemption does not extend to its subordinate or affiliated units. When making purchases, subordinate units may not use the exemption number assigned to the parent organization. Such misuse may result in the revocation of the parent organization's exemption.

You may not use this form to make tax-exempt purchases of motor fuel or diesel motor fuel. Since No. 2 heating oil falls within the definition of diesel motor fuel, you may not use this form to purchase it tax exempt. You must use Form FT-1020, *Exemption Certificate for Certain Taxes Imposed on Diesel Motor Fuel and Propane* or Form FT-1025, *Certificate for Exemption from Certain Taxes Imposed on Diesel Motor Fuel*, to claim exemption on heating oil.

Hospitals that have been granted an exemption from sales and use tax pursuant to section 1116(a)(4) of the Tax Law may claim exemption on the purchase of motor fuel by using Form FT-937, *Certificate of Sales Tax and Motor Fuel Tax Exemption for qualified Hospitals*.

Need Help?

For forms or publications, call toll free (from New York State only) 1-800-462-8100. From areas outside New York State, call (518) 438-1073.

For information, call the Business Tax Information Center toll free (from the continental U.S.) 1-800-972-1233. You can also call toll free (from New York State only) 1-800-CALL TAX (1-800-225-5829). From areas outside New York State, call (516) 438-8581.

Telephone assistance is available from 8:30 a.m. to 4:25 p.m., Monday through Friday.

Persons with disabilities — In compliance with the Americans with Disabilities Act, we will ensure that our lobbies, offices, meeting rooms and other facilities are accessible to persons with disabilities. Instructions

Seller

All entries have been completed and an officer of the organization has signed the certification, you may accept it to exempt sales to the organization named. The exempt organization must be the direct purchaser and payer of record. Any bill, invoice or receipt you provide must show the organization as the purchaser. Payment must be from the funds of the exempt organization.

Do not accept this form to exempt sales of motor fuel or diesel motor fuel, including No. 2 heating oil (see Purchaser section).

The exempt organization must give you certification at the time of the organization's first purchase. A separate document is not necessary for each subsequent purchase, provided that the exempt organization's name, address, and certificate number appear on the sales slip or billing invoice. The certification is considered part of each order and remains in force unless revoked. If a certification with all entries completed is not received within 90 days after the delivery of the property or service, you will share with the purchaser the burden of proving the sale was exempt.

You must keep this *Exempt Organization Certification* for at least three years after the date of the last exempt sale substantiated by the certification.

Purchaser

Complete this certification and give it to the seller. This form may be reproduced without prior permission from the Tax Department.

Your exemption from New York State and local sales and use tax does not extend to officers, members or employees of the exempt organization. Personal purchases made by these individuals are subject to sales and use tax. An organization's exemption does not extend to its subordinate or affiliated units. When making purchases, subordinate units may not use the exemption number assigned to the parent organization. Such misuse may result in the revocation of the parent organization's exemption.

You may not use this form to make tax-exempt purchases of motor fuel or diesel motor fuel. Since No. 2 heating oil falls within the definition of diesel motor fuel, you may not use this form to purchase it tax exempt. You must use Form FT-1020, *Exemption Certificate for Certain Taxes Imposed on Diesel Motor Fuel and Propane* or Form FT-1025, *Certificate for Exemption from Certain Taxes Imposed on Diesel Motor Fuel* to claim exemption on heating oil.

Hospitals that have been granted an exemption from sales and use tax pursuant to section 1116(a)(4) of the Tax Law may claim exemption on the purchase of motor fuel by using Form FT-937, *Certificate of Sales Tax and Motor Fuel Tax Exemption for qualified Hospitals*.

Subject: AWS Innovate NYC: learn how the cloud helps solve your biggest challenges
Date: Friday, December 08, 2017 9:03:39 AM

AWSDear Karen,

State and local governments are leading the way in the drive to innovate for and with citizens. Whether through open data initiatives, public safety modernization, education reform, citizen service improvements or infrastructure programs, more and more local governments are turning to Amazon Web Services to provide the cost-effective, scalable, secure and flexible infrastructure necessary to make a difference.

Join AWS for a day of informative sessions about how the cloud brings unrealized benefits to government agencies. [Register Here.](#)

Topics to be covered include:

- **Why AWS** - How State and Local Governments are embracing the cloud for innovation
- **Solving Problems with AWS** - How government agencies use the cloud to problem solve for mission-critical issues
- **Achieving Business Value with AWS** - How the cloud brings security, agility, and productivity while achieving cost savings.
- **Succeeding with AWS**- Customer presentation
- **Technology Showcase** - an introduction to cloud technology
- **AWS Cloud Migration** - How to move with minimal disruption, cost, and time
- **Big Data and Analytics** - Creating a measurable data driven culture that focuses on results
- **Partner Spotlight** - How AWS enables innovative government solutions.

Click the [registration link](#) to access the full schedule and register for the event.

Regards,

A complimentary breakfast and lunch will be provided during the event. You should consult with an appropriate ethics or procurement official to determine whether you are permitted to attend. By RSVP'ing, you certify that your attendance (1) is neither prohibited by nor inconsistent with any applicable laws, regulations, binding orders, or applicable ethics or procurement rules, (2) will not create a conflict of interest for AWS, and (3) will not conflict AWS from participating in the any on-going procurements.

Margy,

I hope this email finds you doing well. I am writing to inform you that I will be leaving my position at City Hall on January 12, 2018. I truly cherished your partnership and I hope we can stay in touch in my new capacity. I will be doing similar work at the national level. I hope I can still call on you as a potential partner in this work.

I am also writing to introduce you to another stellar partner of ours at Expedia. Sarah Davis is the Senior Global Initiative Manager for Inclusion and Diversity at Expedia. When I told her about the great team at Amazon she was really interested in making contact with you. I've cc'd her on this email. I look forward to being in contact with you on where I will be landing next.

Best Regards,

W. Cyrus Garrett

Hi Sarah,

I hope you are having a good week. As promised, I wanted to send over the brochure for our CareerPass program to give you a better idea of what we typically do for site visits.. Let me know if you think this would be a good fit for Amazon and we can try to plan for something in 2018.

Best,
Devin

About

The Center for Youth Employment

The Center pursues a simple but profoundly important mission: to dramatically expand and improve opportunities for young adults in New York City to gain work experiences, add skills, and explore potential career interests – all with an eye towards supporting the next generation of worker talent to power our local economy.

CareerPass

As part of its mission to help young New Yorkers explore potential careers, the Center has launched CareerPass—a set of opportunities for youth and young adults to visit prominent New York City employers in a variety of industries including Finance, Insurance, Fashion, Real Estate, Hospitality, Media, and Technology. Interested firms hosts small groups of youth (typically 15-18 visitors) for part of a work day, arranging a tour of their work space, and describing their business operations and the various career paths within their industry.

CareerPass provides an invaluable opportunity for youth to get a sense of what it's like to work for some of the City's highest profile companies, gleaned directly from industry professionals. Participants come away with a better understanding of the organization's day-to-day business activities that can inform their own decisions about possible future career paths, and what educational and work experiences they should pursue to fulfill their own ambitions.

To get involved in CareerPass, visit <https://cye.cityofnewyork.us/sign-up>

Why Host a CareerPass Visit?

- 1 This experience will give you an opportunity to bring more young people into your workplace and deepen engagement with young adults in your community, better understanding their interests, challenges and aspirations as potential workers or customers.
- 2 Hosting a site visit is a light-touch, low-commitment way for you to initially connect with youth and young adults, and gauge staff and executive-level interest in additional activities, such as taking on interns.
- 3 Non-profit organizations that provide work readiness and related services for youth will benefit from exposure to prominent employers, and learn more about how to better prepare their young adults for potential employment opportunities at your organization.
- 4 Finally, the youth and young adults who participate will have a unique opportunity to learn about your industry and observe your employees in action. This experience will have a lasting impact – giving them greater insight about how to prepare themselves for the world of work through the lens of a potential position with your organization.

The CareerPass Collaboration

Each CareerPass tour is planned through collaboration between the Center, a host company, and a community-based nonprofit.

The Center's Role

Connects interested firms with nonprofit organizations running programs serving youth and young adults.

Works with host companies and nonprofits to develop an agenda for the visit and advance and follow-up activities

Host Organization's Role

Provides a program of 2-4 hours for visiting youth, including a tour of the physical site, opportunities for Q&A with selected staff, and well-prepared speakers and presenters

Offers a breakfast, lunch or a snack for visitors as appropriate given timing of visit

Community-Based Nonprofit's Role

Shares a description of organization and program and number and names of all visitors with the host employer in advance of the visit

•Prepares youth in advance of the visit to ensure they have a valuable experience, and conducts appropriate follow-up activities

Arranges all logistics of youth travel to and from the site visit

Youth
Hired

Youth say...

"I really enjoyed the tour because I love fashion, makeup, and design. Being able to tour the office and talk with staff strengthened how much I really want to be in this field."

- Youth participant at an international fashion brand

"I used to want to pursue a career in the magazine world but was always discouraged. Now that I've seen how many opportunities for growth and learning there are in a magazine company, I actually feel encouraged."

- Youth participant at a premier media company

"The biggest takeaway for me is that you should focus on building real ongoing relationships when networking and not just ones that you contact once or twice for a favor."

- Youth participant at a prominent financial institution

Keys to a Successful Site Visit

Prep Materials

Before the visit, assemble resources and materials that you can share with the Center and nonprofit partner that will help prepare youth for the tour, including background information on your organization (when founded, major lines of business, how many employees, etc.).

Tour

On the day of the visit, lead the small group of youth through a tour of your work site that gives them a sense of the daily activities of your business. Be sure that youth have opportunities to interact with staff working in various functions of your organization.

Discussion

Following the tour, arrange a panel or discussion with employees, ideally those close in age to the visitors. Make sure that you leave time for youth to ask questions!

Evaluation

After the site visit is complete, share your feedback about the experience with the Center so that we can enhance future CareerPass tours for both youth and employers.

Connect

The Center and its partners offer many opportunities for employers to engage with youth beyond site visits. After your visit, consider other ways in which your organization might want to get involved in the other programming, including through mentoring opportunities, partnering with a career and technical education high school or group of schools, hosting high-achieving interns through Ladders for Leaders or participating in the Center's industry networking events.

Sample Schedule: A Day at a Fashion Company

Location: 405 Lexington Avenue, New York, NY 10174

Time: 12:00 – 2:30 PM

Agenda:

12:00 PM	Building Security Check-in (please bring photo ID)
----------	--

12:15 PM	Opening remarks from Host Employer
----------	------------------------------------

12:30 PM	Fashion company private access tour
----------	-------------------------------------

1:00 PM	Photo studios tour
---------	--------------------

1:30 PM	Snack (To Be Provided for Students)
---------	-------------------------------------

1:45 PM	Career Panel Discussion with Host Employer
---------	--

2:15 PM	Q&A as time permits
---------	---------------------

Sample Schedule: A Day at a Technology Company

Location: 1 World Trade Center, New York, NY 10007

Time: 10:30AM – 3:30PM

Agenda:

10:30AM Building Security Check-in (please bring photo ID)

10:45AM Opening remarks from Host Employer

11:00AM Tour of company offices and facilities
Brief introductions to employees from across the
organization

12:30PM Lunch (to be provided for youth)

1:00PM Career Panel Discussion with Host Employer
Executives

1:30PM Experiential learning activity for youth
For example: Youth will observe a short coding
demo to teach them very basic computer
programming.

3:00PM Q&A and Networking as time permits

Frequently Asked Questions

Is there any cost to the employer for CareerPass?

We ask that host employers cover the expenses for a meal or snacks provided to the youth and young adults who participate. Otherwise, there are no costs.

Who are the youth who will be participating in the visit?

The youth are New York City residents ages 14 to 24 who are participating in the Department of Youth and Community Development (DYCD)'s In-School Youth, Out-of-School Youth, or Young Adult Internship programs. These programs offer work experience, career-focused education, and training or related services to youth and young adults. The community-based nonprofit partners that implement these programs select the youth who will be participating in the visit, and connect them with the Center and the host organization.

How long does the site visit have to be?

A typical site visit lasts for two to four hours. It all depends on your preference!

We don't have enough space to accommodate a large group of youth, but still wish to participate in the program. How can we do this?

On average, employers participating in CareerPass host groups of 15 to 20 youth. However, if you only have the capacity to host fewer than 15 youth, you can still participate. Simply communicate this to your contact at the Center during your first conversation about the program.

What are my responsibilities as a host employer?

- Have at least one employee available for the entire site visit and tour.
- Let your organization's employees know that the site visit is taking place, so they can be prepared to meet the young adults during the tour.
- Develop a detailed schedule for the tour.

How do I sign up for CareerPass?

Please email cye@cityhall.nyc.gov to sign up for the program or if you have any questions.

Where can I get more information about the Center for Youth Employment?

To learn more about the work that we do at the Center, you can visit our web page at: <https://cye.cityofnewyork.us/>

Hi Alex,

Thank you and I'm looking forward to the meeting next week (and hopefully we won't have as much snow!).

- I wanted to make sure there was guest Wifi available as I was planning to do a demo, if not I can just use PowerPoint slides.
- Could you give me an Approx. idea how many people will attend?

Thank you, and stay warm! ☺

Amazon Business for Government

Government customers tell us they love the convenience, price and selection of shopping online. Amazon has created a market place that will improve the way buyers make purchases and the way sellers and manufacturers engage with customers.

Amazon's Goal is to help our Partners in Public Sector:

- Reduce costs with consistently low pricing and price transparency
- Save buyers time finding and purchasing goods
- Tools and controls that can be configured to fit purchasing policies and processes.

Thank you!

New York City Mayor's Office - Minority and Women-owned Business Enterprise program
Briefing with Amazon Business

Wednesday, January 10th at 9:30 a.m.

Amazon Business Attendees:

- Jennifer Kelleher - Strategic Initiatives for State and Local Government
jenkel@amazon.com

Welcome/Introduction (Jennifer Kelleher)

M/WBE – Overview (Jonnel Doris)

- Top business issues and priorities

Amazon Business Seller Credentials program

- Amazon Business Marketplace
- Opportunities to Identify and Increase local New York Suppliers

Small businesses and businesses owned by women, minorities, veterans, and other diverse groups are an important part of the U.S. economy. Amazon Business, which supports such sellers through our Seller Credentials program, has launched a new search tool that enables buyers to easily identify and purchase products from these sellers.

Hi Alex,

Yes, attached please find (2) items: Agenda and PowerPoint Deck. Please note you are welcome to make printed copies of the Agenda, but the slides have not been approved for distribution but would be great if you can have the slides ready for the presentation.

I'm looking forward to see you tomorrow.

With optimism,
Jen Kelleher

Hi Jennifer. Wifi will be available. I would also have PowerPoint as a backup. Feel free to send you presentation to me before the end of day on Tuesday, January 9th. I will make sure it is displayed and in the room by 9:30am on Wednesday.

I would plan on about 15 individuals in attendance.

Let me know if you have any additional questions.

Best!

Dear Adrienne and Joe,

Good afternoon to you both! Hope you're doing well.

Adrienne--I wanted to connect you with Joe Flasher, who leads the Open Data team at Amazon Web Services. He'll be attending the event on the 25th and is

hoping to find some to connect with your team on the day of.

Joe--Adrienne is a long-time Civic Hall community member and the Director of Civic Engagement & Strategy for the City of New York (as part of the Mayor's Office of Data Analytics). She's our partnership lead for the open data events at Civic Hall.

Hope you both can find time for a chat on the 25th! Let me know if there is anything I can do.

Best,

Paramjot Kaur

Attachments: [CareerPass Guide.pdf](#)

Hi Sarah,

Our office organizes site visits for our CareerPass program, which brings a group of young people to your office to learn about the career paths available and skills need to work at Amazon and the tech industry. Companies usually give a tour of the office, have a panel or Q&A session with employees in different departments to give an idea of the different career paths available in the company, and (if possible) provide students with resume review or mock interviews. The students usually get a lot out of it.

I've attached the brochure with more details about the program. Let me know if you all have the interest and capacity.

Thanks,
Devin

Subject: RE: NYC Workforce Programs

Hi Sarah,

Happy 2018! I wanted to circle back on our conversation from before the holiday.

As an update, we have asked our colleagues at the DOE's Career and Technical Education team and they indicated they had not had any interactions with Amazon to date. We are currently looking into other relationships Amazon has with DOE, and are brainstorming internally about how Amazon and

CYE can best work together.

In the meantime, I wanted to see if there was an interest on your end to do a site visit at Amazon's NY offices. We'd love to get something set up in the coming months, if possible.

Thanks for your help!

Best,
Devin

About

The Center for Youth Employment

The Center pursues a simple but profoundly important mission: to dramatically expand and improve opportunities for young adults in New York City to gain work experiences, add skills, and explore potential career interests – all with an eye towards supporting the next generation of worker talent to power our local economy.

CareerPass

As part of its mission to help young New Yorkers explore potential careers, the Center has launched CareerPass—a set of opportunities for youth and young adults to visit prominent New York City employers in a variety of industries including Finance, Insurance, Fashion, Real Estate, Hospitality, Media, and Technology. Interested firms hosts small groups of youth (typically 15-18 visitors) for part of a work day, arranging a tour of their work space, and describing their business operations and the various career paths within their industry.

CareerPass provides an invaluable opportunity for youth to get a sense of what it's like to work for some of the City's highest profile companies, gleaned directly from industry professionals. Participants come away with a better understanding of the organization's day-to-day business activities that can inform their own decisions about possible future career paths, and what educational and work experiences they should pursue to fulfill their own ambitions.

To get involved in CareerPass, visit <https://cye.cityofnewyork.us/sign-up>

Why Host a CareerPass Visit?

- 1 This experience will give you an opportunity to bring more young people into your workplace and deepen engagement with young adults in your community, better understanding their interests, challenges and aspirations as potential workers or customers.
- 2 Hosting a site visit is a light-touch, low-commitment way for you to initially connect with youth and young adults, and gauge staff and executive-level interest in additional activities, such as taking on interns.
- 3 Non-profit organizations that provide work readiness and related services for youth will benefit from exposure to prominent employers, and learn more about how to better prepare their young adults for potential employment opportunities at your organization.
- 4 Finally, the youth and young adults who participate will have a unique opportunity to learn about your industry and observe your employees in action. This experience will have a lasting impact – giving them greater insight about how to prepare themselves for the world of work through the lens of a potential position with your organization.

The CareerPass Collaboration

Each CareerPass tour is planned through collaboration between the Center, a host company, and a community-based nonprofit.

The Center's Role

Connects interested firms with nonprofit organizations running programs serving youth and young adults.

Works with host companies and nonprofits to develop an agenda for the visit and advance and follow-up activities

Host Organization's Role

Provides a program of 2-4 hours for visiting youth, including a tour of the physical site, opportunities for Q&A with selected staff, and well-prepared speakers and presenters

Offers a breakfast, lunch or a snack for visitors as appropriate given timing of visit

Community-Based Nonprofit's Role

Shares a description of organization and program and number and names of all visitors with the host employer in advance of the visit

- Prepares youth in advance of the visit to ensure they have a valuable experience, and conducts appropriate follow-up activities

Arranges all logistics of youth travel to and from the site visit

CareerPass Impact

320

**Youth
Served**

13

**Industry
Partners**

Youth say...

"I really enjoyed the tour because I love fashion, makeup, and design. Being able to tour the office and talk with staff strengthened how much I really want to be in this field."

- Youth participant at an international fashion brand

"I used to want to pursue a career in the magazine world but was always discouraged. Now that I've seen how many opportunities for growth and learning there are in a magazine company, I actually feel encouraged."

- Youth participant at a premier media company

"The biggest takeaway for me is that you should focus on building real ongoing relationships when networking and not just ones that you contact once or twice for a favor."

- Youth participant at a prominent financial institution

Keys to a Successful Site Visit

Prep Materials

Before the visit, assemble resources and materials that you can share with the Center and nonprofit partner that will help prepare youth for the tour, including background information on your organization (when founded, major lines of business, how many employees, etc.).

Tour

On the day of the visit, lead the small group of youth through a tour of your work site that gives them a sense of the daily activities of your business. Be sure that youth have opportunities to interact with staff working in various functions of your organization.

Discussion

Following the tour, arrange a panel or discussion with employees, ideally those close in age to the visitors. Make sure that you leave time for youth to ask questions!

Evaluation

After the site visit is complete, share your feedback about the experience with the Center so that we can enhance future CareerPass tours for both youth and employers.

Connect

The Center and its partners offer many opportunities for employers to engage with youth beyond site visits. After your visit, consider other ways in which your organization might want to get involved in the other programming, including through mentoring opportunities, partnering with a career and technical education high school or group of schools, hosting high-achieving interns through Ladders for Leaders or participating in the Center's industry networking events.

Sample Schedule: A Day at a Fashion Company

Location: 405 Lexington Avenue, New York, NY 10174

Time: 12:00 – 2:30 PM

Agenda:

12:00 PM	Building Security Check-in (please bring photo ID)
----------	--

12:15 PM	Opening remarks from Host Employer
----------	------------------------------------

12:30 PM	Fashion company private access tour
----------	-------------------------------------

1:00 PM	Photo studios tour
---------	--------------------

1:30 PM	Snack (To Be Provided for Students)
---------	-------------------------------------

1:45 PM	Career Panel Discussion with Host Employer
---------	--

2:15 PM	Q&A as time permits
---------	---------------------

Sample Schedule: A Day at a Technology Company

Location: 1 World Trade Center, New York, NY 10007

Time: 10:30AM – 3:30PM

Agenda:

10:30AM Building Security Check-in (please bring photo ID)

10:45AM Opening remarks from Host Employer

11:00AM Tour of company offices and facilities
Brief introductions to employees from across the organization

12:30PM Lunch (to be provided for youth)

1:00PM Career Panel Discussion with Host Employer
Executives

1:30PM Experiential learning activity for youth
For example: Youth will observe a short coding demo to teach them very basic computer programming.

3:00PM Q&A and Networking as time permits

Frequently Asked Questions

Is there any cost to the employer for CareerPass?

We ask that host employers cover the expenses for a meal or snacks provided to the youth and young adults who participate. Otherwise, there are no costs.

Who are the youth who will be participating in the visit?

The youth are New York City residents ages 14 to 24 who are participating in the Department of Youth and Community Development (DYCD)'s In-School Youth, Out-of-School Youth, or Young Adult Internship programs. These programs offer work experience, career-focused education, and training or related services to youth and young adults. The community-based nonprofit partners that implement these programs select the youth who will be participating in the visit, and connect them with the Center and the host organization.

How long does the site visit have to be?

A typical site visit lasts for two to four hours. It all depends on your preference!

We don't have enough space to accommodate a large group of youth, but still wish to participate in the program. How can we do this?

On average, employers participating in CareerPass host groups of 15 to 20 youth. However, if you only have the capacity to host fewer than 15 youth, you can still participate. Simply communicate this to your contact at the Center during your first conversation about the program.

What are my responsibilities as a host employer?

- Have at least one employee available for the entire site visit and tour.
- Let your organization's employees know that the site visit is taking place, so they can be prepared to meet the young adults during the tour.
- Develop a detailed schedule for the tour.

How do I sign up for CareerPass?

Please email cye@cityhall.nyc.gov to sign up for the program or if you have any questions.

Where can I get more information about the Center for Youth Employment?

To learn more about the work that we do at the Center, you can visit our web page at: <https://cye.cityofnewyork.us/>

Subject: Give your employee incentives program some “wow”
Date: Monday, February 05, 2018 11:03:50 AM

amazon incentives

Hi Jessica,

Getting your recognition program right is the key to creating the kind of engaged culture that's foundational to your brand.

So how do you do it?

Add “wow.”

Give your people something they really want – like an Amazon Gift Card.

More and more leading organizations are choosing Amazon Gift Cards over other options because of the easy setup, quality customer service and millions of redemption options.

Chances are we could help your business add “wow,” too.

Best,

Scott Merlino

Subject: AWS Storage
Date: Wednesday, February 14, 2018 9:08:13 AM

Yuni,

State and Local Government IT Departments are faced with storing, managing, retaining, and protecting significant amounts of data. Changes to data retention requirements and policies, application modernization, digitization, and many other factors are accelerating the rate at which State and Local Government entities are generating data making it increasingly difficult and costly to scale current storage solutions in a timely manner.

AWS storage services can help address these challenges leveraging cost effective and highly durable storage with pay as you go pricing and no up-front costs. The AWS Storage Gateway service helps customers seamlessly integrate existing on-premises storage infrastructure and data with the AWS Cloud. It uses industry-standard storage protocols to connect existing storage applications and workflows to AWS cloud storage services for minimal process disruption. It maintains frequently accessed data on-premises to provide low-latency performance while securely and durably storing data in Amazon S3, Amazon EBS, or Amazon Glacier cloud storage. It also includes a highly optimized data transfer mechanism, with bandwidth management, automated network resilience, and efficient data transfers. Storage Gateway also integrates your data with AWS encryption, identity management, monitoring, and storage services to combine the security, durability, and scalability of the AWS Cloud with existing storage environments.

Please feel free to call or email me at (908) 303-8558 if you have any questions or want to learn more.

Thank You

Jason Trego

Subject: Amazon FC tour- follow up (1st of 2 emails) existing NYC account data
Date: Wednesday, February 21, 2018 4:29:18 PM

Hello Suzette, (adding Jonnel and Tonya)

It was great to see you last week at the FC tour and thank you so much for taking the time to meet with our team! Tonya and I are interested in working with you to bring visibility to your NYC M/WBEs suppliers on the Amazon Business marketplace.

I wanted to circle back with you in regards to your questions around (2) two items:

- 1. What is the existing footprint of Amazon accounts for NYC agencies?**
- 2. What data do we have on the existing Supplier Credentials for New York?**

I'd like to address the first question here in this email and will send a 2nd email to address Supplier Credentials.

First I would say there are hundreds of individual amazon accounts across all NYC agencies. Some are from the consumer account (amazon.com) and a few are with Amazon Business. I was able to pull a snap shot of the purchase data from (19) agencies from 2016 for your review. This purchase data does not cover every agency, but I thought it would provide a good sample of the Amazon.com purchase history for your review:

- *Currently the City of New York agencies have a mix of Amazon.com consumer accounts and Amazon Business Accounts with the majority of purchases happening on the consumer account.*
- *In 2016, there were approximately (373) Amazon Business accounts, and (2,800) Amazon Consumer accounts with the email domain @nyc.gov with approximately \$2,452,353.00 in spend. I wanted to advise that these numbers are very conservative and when other customers have pulled internal p-card reports the numbers always come back much higher.*

My recommendation to OMB is to have DCAS open a master citywide Amazon Business account for the micro spend happening on the credit cards. This would allow many benefits to the city including but not limited to:

- 1. Supplier Credentials:** The ability for each agency buyers to search for supplier diversity credentials and have detailed reports on those purchases.
- 2. Open, Competitive Business only pricing:** Amazon Business offers price or quantity discounts on more than 7 million items. (lower pricing than what is shown on amazon.com that is only available on the Amazon Business)
- 3. Amazon Tax Exemption Program:** With a master account for NYC we can apply the tax

exemption across all agencies to ensure not tax is applied on consumer accounts or any of the Amazon Business accounts for the individual agencies.

4. **No contract needed:** There are no costs, minimum quantity requirements or spend limits to create an Amazon Business account.

Tonya and I would also like to follow up with you on a separate call to discuss next steps.

Best Regards,

Jen Kelleher

Cc: [Watson, Tonya](#); [Doris, Jonnel](#)
Subject: RE: Amazon Business- follow up (2nd email) Supplier Credentials data
Date: Wednesday, February 21, 2018 4:58:01 PM

Hello Suzette, (adding Jonnel and Tonya)

As promised I wanted to provide you with some data points on our existing Amazon Business suppliers specifically for New York City.

Here are my findings (Reminder that these are rough aggregates):

1. Roughly 6,000 of US-based Amazon Business Suppliers are based out of NYC.
2. Among those, about ~400 have a credential
3. 2017 Gross Merchant Sales for NYC Sellers is \$4.3 billion

As Amazon Business continues to innovate in 2018, one of our focus areas is helping customers discover, promote, and report on purchases from local, small, and socio-economically diverse suppliers. Over the past year, we have increased the number of diverse credentialed suppliers on our Marketplace, enhanced our reporting functionality, and launched tools to preference credentialed suppliers to your end users.

In an effort to grow the program and help customers reach their Diversity Spend targets (e.g. goals to purchase from Small, Women, Minority, or Veteran owned businesses), we are launching a pilot this spring with a limited number of customers. This will give your organization an early opportunity to shape and measure the program's effectiveness before it expands more broadly.

If this pilot is of interest to you, we can set up a call to discuss further and see if it's a good fit.

Best Regards,

Jen Kelleher

+ Jason for visibility

Hey Adrienne, great to hear from you again! Open Data Week is definitely on my radar, but unfortunately, I'll be traveling. I'll pass it along to some of my colleagues who may be able to make it.

And I can definitely spare some stickers. If you can give me an address, I can send them to you. When do you need them by? If you can send me some pictures of them at your event or similar, I think I can probably get our social media folks to give your events some social media love too.

Also, I've still got it on my todo list to look at your list of open datasets and see if any are of

particular interest to explore further for us. Maybe that'll be my Open Data Week commitment.

Mark!

Thanks for getting back to me so quickly. I felt inspired to look you up for some reason on Saturday and I'm glad I did.

I have just started an initiative with Amazon's Sustainability team to expand access to sustainability data. Conor Delaney (cc'd) is an environmental data scientist who just joined my team to help develop that. We're still in research mode, and I'd like to know if we could book some time on the phone to learn about what you're doing and if there's anything we can help with. Let me know if there are any days that work especially well for you in the coming weeks and I'll get something on the books.

Conor, Mark and I went to high school together and he's great. He's now the director of the NYC Mayor's Office of Sustainability.

AWS Public Sector Summit

We would like to extend you a special opportunity to register early for our ninth annual **AWS Public Sector Summit – Washington, DC**, scheduled for June 20-21, 2018.

The move to the cloud is unlike any other technology shift in our lifetime. Don't miss the opportunity to learn how to use the cloud for complex, innovative, and mission-critical projects. With over 100 breakout sessions led by visionaries, experts, and peers, you'll take home new strategies and tactics for shaping culture, building new skillsets, saving costs, and achieving your mission.

Learn More and Register »

Pre-Day: Tuesday, June 19, 2018

General Sessions: Wednesday, June 20-21, 2018

Location: [Walter E. Washington Convention Center](#) - 801 Mount Vernon Place NW, Washington, DC 20001

Register now for:

- 100+ breakout sessions on topics such as DevOps, Big Data, Internet of Things, security and compliance, adoption models, scientific computing, open data, and more;
- A keynote with a dynamic line-up of global CIOs, plus other mainstage AWS features;
- Direct access to AWS technologists;
- Experiential bootcamps and workshops – stand by for updates and a chance to register;
- Networking opportunities with partners and peers;
- A high-energy expo featuring AWS Partners.

Complimentary for government, education, nonprofits employees; AWS Public Sector Partner Program members; and AWS customers, sponsors, and exhibitors.

See you there!

The AWS Public Sector Team

Date: Thursday, May 31, 2018 11:15:06 AM

Hi Linda,

At Amazon Business, we want to make sure our public sector partners are utilizing all available resources to ensure that tax payer dollars are used wisely. Over the last year, we have made tremendous functionality advancements to our site that will drive more value for you. One area where we are helping government customers is our ability to help facilitate one-time volume based purchases. We have millions of items with business only pricing for you to leverage. As your Customer Advisor, I can help you through this process. For questions regarding your internal purchasing policies and guidelines, please make sure to work with your procurement team.

You can also leverage your U.S. Communities contract to help you with your procurement needs. If you are not leveraging U.S. Communities through your Amazon Business account, please reach out so I can show you how.

Please let me know if there's a good time to connect with you, or click [here](#) to add time to my calendar. Don't hesitate to reach out even if you have general questions about Amazon Business as I'm here to help any way I can.

Thank you,

Jennifer Kelleher
jenkel@amazon.com

We hope you found this message to be useful. However, if you'd rather not receive future e-mails of this sort from Amazon, please let us know your [email preferences](#).

Mark,

No worries! First off: I'm in Munich. Trying to stay here for a bit because I've been traveling too much, although the trip to the Adriatic coast was with family, so I didn't mind that one.

I will be at the event in DC in June. Hopefully you can come! If not, I'll find an excuse to get to NYC. I've been thinking about our conversation and how you're focusing on electrification/minimization of vehicles in NYC. I want to help with that.

Regardless, please put Syed in touch. Definitely happy to talk with him.

Jed!

Sorry for the late reply. Will dig up the round table invite and see if I can make it work.

Where are you now? Thought I saw you were on HK and then it looked like you were diving into the Adriatic Sea???

Will you be at the DC event in June?
Would be good to catch up again.

Also, before I forget. I have a friend, Syed, (partner of a work colleague) that is early in his career but looking for some advice on getting further into the cloud game.

I'm hoping I can connect him to you and maybe he can get some insight or equally as useful — maybe you know someone in the AWS world that might be here in NYC or DC that he can talk to. Let me know if I can follow up on that.

Will ping you about the round table shortly.
Thanks,

Mark

On May 17, 2018, at 2:43 PM, Sundwall, Jed <jed@amazon.de> wrote:

Mark! I wish I could go camping with you.

Also, you should have received an email like the one below earlier this week. I'm putting on this event and I think it'd be great to have you in the room if you can make it. If you can't, I'd appreciate any recommendations from you of other people who add to this discussion.

40 looks good on you, btw.

<image001.png>

I am delighted to invite you to participate in a private roundtable for chief data officers. Please join us for *Putting Data to Work for the Public Good*, hosted by the Amazon Web Services (AWS) Institute and the AWS Open Data Program, on **Tuesday, June 19, from 3:00 - 5:00 PM**, at Amazon's DC Offices at 601 New Jersey Ave NW Suite 900, Washington, DC 20001. Please join this dialogue moderated by **Sonal Shah**, Executive Director, Professor of Practice at the Beeck Center for Social Impact and Innovation at Georgetown University in conversation with **Tom Schenk**, Chief Data Officer, Department of Innovation and Technology, City of Chicago and **Dan Morgan**, Chief Data Officer, U.S. Department of Transportation.

Register [here](#) by June 1 to participate. We hope you'll also stay for a rooftop reception following the small roundtable, from 5:00 - 6:30 PM. These events will be held prior to this year's [AWS Public Sector Summit](#).

As organizations increasingly rely on data to accomplish their goals,

new leaders with a need to balance expertise in statistics, policy, management, and evolving technology are emerging. Among these leaders, the role of Chief Data Officer has risen into particular prominence. This off-the-record dialogue, held under Chatham House Rules, will provide a forum for public sector chief data officers and open data specialists to identify key challenges, opportunities, and good practices in using open data to improve delivery of services to citizens.

About the AWS Open Data Program

The [AWS Open Data Program](#) helps data providers understand how the cloud can be used to expand access to data. The AWS Open Data Program also collaborates with AWS customers to develop innovative methods of staging data for analysis in the cloud, enabling data users to spend more time on data analysis than on data acquisition.

About AWS Institute

The [AWS Institute](#) convenes and engages global leaders who share an interest in solving some of the world's most pressing challenges using technology. The Institute brings together experts and decision makers from across government, business, academia, and nonprofit organizations for small, private, high-level, collaborative roundtable discussions to explore innovative ideas and activities to advance and transform the public sector. The Institute provides a dedicated platform for public-private dialogue and resources to implement ideas into actions.

If you have any questions, please contact Cristina McGlew Castro at mccastro@amazon.com. We look forward to a dynamic discussion and hope you can join us.

Sincerely,

David thank you so much!

Dear Claus, I really appreciate your help with this project. Our ultimate goal is so make NYC the most welcoming ecosystem for European companies/investors on the one hand. On the other, we want to strengthen the support for NYC investors and companies expanding in Europe.

This is just one of the first steps for a new and enhanced strategy and as such, it is extremely important for us.

I noticed that the best (and probably the only way) to achieve participation in the survey is to send a personalized email to a targeted group. Even better if I am CCed as it makes it more official that you are partnering with the Mayor's Office of New York.

If you could do that it would be really wonderful!

Thanks again!
Warmly,
Gianluca

Oggetto: European Tech Leaders Survey et al

Dear David,

In an effort to enhance the support system for incoming European tech businesses/investors, the **New York City's Mayor's Office** invites key tech leaders across Europe - preferably scale-ups but not only - to participate in an 8 min [survey](#).

Insights will also help the City support the NYC tech business/investment community interested in connecting with European ecosystems.

I would be very grateful should you ask startups, scale-ups, larger companies, VCs you are working with/invested in, to take part in the survey - **anywhere in Europe**.

We will share aggregated results with you and respondents who express an interest.

Thank you for your support!
Gianluca

Reply-To: terri.baumann@kglobal.com

Amazon hosts tour of construction site of new
Staten Island fulfillment center

No Images? [Click here](#)

On Tuesday, June 19 at 2:00 p.m., join Amazon for a sneak peek hard-hat tour

of the construction site of its new fulfillment center in Staten Island.

This is the first fulfillment center in the state of New York and will create over 2,250 full-time jobs. You are invited to see what it takes to construct an 855,000 square-foot innovative customer fulfillment facility.

Please RSVP by Monday, June 18. Space is very limited. If you are interested in bringing staffers or a guest, please confirm with Amazon first.

WHEN: Tuesday, June 19 | 2:00 PM

WHERE: 546 Gulf Avenue | Staten Island, NY 10314

This is an active construction site and your safety is our chief concern. Participants need to be able to traverse about 4 flights of stairs and be aware of construction debris near the tour path. Please wear pants and heavy, flat, closed-toe shoes. You will be provided a hard hat and safety vest to wear while onsite.

Amazon Fulfillment
Staten Island Fulfillment Center
546 Gulf Avenue
Staten Island, NY 10314

You are receiving this email, because you have been invited to join Amazon as they host a tour of the construction site of their new Staten Island fulfillment center. Space is limited. If you wish to bring a guest, please contact Terri Baumann at terri.baumann@kglobal.com

Jed-

Apologies for not being able to make the Data Roundtable in DC this week. I would have loved to connect with you. (*You are more than welcomed to stop over in NYC if you are still stateside!*)

I'm connecting you via email to [REDACTED] (cc'd and resume attached)
[REDACTED] is super sharp and had a lot of interest in working for/with AWS when we last spoke, so naturally, I thought who better to talk to then Jed Sundwall, cloud guru and open data aficionado.

This could be directly connecting him to AWS folks in NYC or DC that might be hiring or just general career advice for someone starting out (in the cloud). Or anything in-between.
Regardless, He can follow up directly with you. I really appreciate you being willing to chat with him.

I will follow up with you on another thread to see when we can talk about EV's!!

Take care,

It's nice to meet you! You've got a very interesting background that Amazon would benefit from. I'm happy to talk, but I'm in Munich, so earlier your time is always better for me. How early can you talk and are there any days that are good for you in the coming two weeks?

Thanks,

Jed Sundwall

Thanks for the introduction, Mark.

Jed,

Hope you're doing well. Thank you for agreeing to talk with me.

Through my experiences, I've seen what a disruptive force technology can be in shaping our interactions and I'm excited to find new ways to empower individuals and organizations with connectivity.

[REDACTED]

[REDACTED]

I would love to hear more about your work at Amazon Web Services and what led you to work with open data.

Thank you in advance for taking the time to talk. Let me know when you might be available.

Looking forward to hearing from you,

[REDACTED]

Hi Matt,

Hope all is well with you. It was great meeting you a few weeks ago at NYC City Hall.

Per the vmail I left you, I wanted to connect you with some of my colleagues at the New York City Economic Development Corporation (NYC EDC) who are exploring ways to advance the artificial intelligence industry in the City. They are trying to understand how to both make New York City a leader in the space, particularly in talent and commercialization, and also ways to drive some of the social benefits AI can bring to NYC.

From their research, it looks like Ralph Herbrich (Director of Machine Learning) or someone on his team is probably the best person to speak to, but appreciate any suggestion of folks whom it would be good to connect. Alia Conbeer, cc'd here, can help coordinate a follow up conversation with whomever is most appropriate.

Thanks so much,
Lindsay

Hi Barbara,

We are certainly open to sharing information more broadly. Thank you for helping to arrange. We will just have to figure out timing for everyone.

Regards,
Cate

Thank you all.

Hindsight is always 20/20, and I now realize I might have convened a larger meeting with more City government agencies in attendance. I am offering to arrange for a second sitting. Let me know if that appeals, and we can discuss the details.

Hi Barbara, Gary, Annabel, Karla and Kate,

Thank you for meeting with us on Tuesday and the helpful discussion around the online SNAP pilot. We really appreciate your enthusiasm and engagement on this project. We are reaching out to NYCHA, Department of Consumer Affairs and the Center for Family Life, as you all suggested. If it is possible, we would love to follow up with you on the list of other key organizations/contacts to help educate all relevant organizations and disseminate information equally and openly. We anticipate inbound questions from SNAP recipients and want to make sure that we are supporting organizations who want that information.

If you have any other questions, feel free to reach out to any of us.

Best Regards,

Cate, Liz and Victor

[NYC and Amazon Business MICRO SPEND v2 \(draft\).docx](#)
Importance: High

Hello,

It's been a minute or two since we last connected. ☺ I wanted to give you both an update on our progress with OMB to create an Amazon Business account for NYC and also ask for your input on next steps. Let me know I can work with Alex to get a call scheduled next week to discuss.

Background:

- **Amazon Business** is a new marketplace for Government buyers that lives on top of Amazon.com -- combining the selection, convenience and value that customers have come to know and love from Amazon.com, with new features like tax exemption and lower pricing that can save tax dollars and address the needs of NYC public sector agencies.
- **Amazon M/WBE suppliers in NY:** Currently we have **more than 81,000 New York-based small and medium-sized businesses selling on Amazon**, many of which have self-identified with one or more quality or diversity ownership credentials. NYC agencies can refine their product search to include offers based on different seller criteria, including minority-owned, women-owned, veteran-owned and small business.

Link to small business impact report: <https://www.aboutamazon.com/supporting-small-businesses/small-business-impact-report>

Amazon Business MICRO SPEND Project Scope (See attachment)

NYC has a mix of Amazon.com consumer accounts (2,800) and a handful of individual Amazon Business Accounts. There is an opportunity to drive savings by centralizing your existing Amazon.com users onto one master Amazon Business account and moving P-Card Micro spend to Amazon. This would also allow the NYC Agencies to purchase products from local NY suppliers with credential suppliers. There is an option to piggyback on our existing U.S. Communities Cooperative contract for Amazon Business (The City of LA recently leveraged this contract).

Looking forward to connecting with you soon!

Subject: Meeting

Hi Alex,

Can you set up a meeting with Amazon Business for the first week in December.

Thanks much,
Jonnel

Jonnel Doris
Senior Advisor and Director of the Mayor's Office for M/WBE
Office of the Mayor

Amazon Business MICRO SPEND Project Scope

NYC cost savings by increasing P-Card Micro Spend to Amazon and converting existing consumer (.com) Accounts to Amazon Business Accounts

OVERVIEW

Amazon Business is bringing the Amazon marketplace to government, with new features and unique benefits that make it easy to drive savings for taxpayers and meet critical government-mission needs. Currently NYC has a mix of Amazon.com consumer accounts (2,800) and Amazon Business Accounts. There is an opportunity to drive savings by centralizing your existing Amazon.com users onto one master Amazon Business account and moving P-Card Micro spend to Amazon. Your Agencies will have a more appropriate and compliant buying experience, with access to broader business selection and business pricing. Amazon Business gives public sector buyers unique access to a range of small and disadvantaged businesses. Currently there are more than 81,000 **New York-based** small and medium-sized businesses already selling on Amazon.

1. Project Savings and Descriptions:

Accounts	Spend	Description
2800	\$700,000.00	.com Accounts
	\$70,000.00	5-10 % Quantity discounts on Amazon Business
	\$61,425.00	8.775% NY sales tax elimination
	\$10,000	5-10% shipping cost eliminated on Shipping (Between \$5k-\$10K approx.)
Savings	\$141,425.00	

2. Implementation / Transition:

- Create a Master Amazon Business Account with Groups (and Sub groups) for each Agency/Department. Both OMB & DCAS would have access to reporting for each Agency/Department at a master level.
- Each Agency will have ability to Opt in, add approvals, add /remove users, full access reporting for all agency purchases. Amazon Business empowers these agencies to monitor and control P-card spend, and to ensure appropriate record retention. Our approval workflows and analytics tools create greater control and level 3 visibility into P-Card spend.
- Amazon will provide project manager to assist with setting up the account and onboarding people. Amazon will provide a track report to confirm the accepted, pending and migrating from existing account.

3. Deliverables and Description

- Quantity discounts & Business Pricing on Amazon Business that are lower than .com accounts
- Tax exemption & Business Prime Shipping
- Ability to search for products by existing supplier credentials (Small business, Women and Minority Owned, and more)
- Data Analytic tools: over 60 fields of data on all purchases

- There are no costs, minimum quantity requirements or spend limits to create an Amazon Business account.

Subject: Amazon Business- NYC Mayor's Office for M/WBE call recap & customer reference info
Date: Friday, September 07, 2018 9:15:23 AM
Attachments: [AMZ17-058 EDP One Pager_Visa_v9\(1\).pdf](#)

Hello Jonnel,

Thank you for taking time out of your busy day on Wednesday to meet with Danielle and me. It was great to catch up and get your insights on how to be thoughtful on our approach to ensure that we are creating an opportunity for easy utilization and not an impediment for M/WBE. Below is a great example from King County on how Amazon Business can have positive impact on specific supplier goals.

Here is a recap and next steps:

1. Phase 1 Convert existing .com spend: We recommended moving NYC existing spend happening on amazon.com to be migrated over to Amazon Business. This will provide the Mayor's Office, OMB, and DCAS with enhanced transaction data that is not available today. You will receive additional line-item detail on purchases made on Amazon Business resulting in increased speed, visibility and accuracy of expense reconciliation. This will help ensure more efficient reporting, and ultimately increased control over your organization's spending behavior. For example, this will allow you to see the **supplier name** for each transaction. (see attached sample).
2. Customer reference: King County has been working closely with Amazon Business on a pilot to help make procurement of smaller dollar items more efficient while making Certified Small Contractors and Suppliers (SCS) and local suppliers more discoverable. Their goal is to have 10% of monthly spend with small business on Amazon Business. They are currently tracking at about 9.87%. (For more information, Our contact at King County is Chris Franco and he can be reached via email at Chris.Franco@kingcounty.gov)
 - <https://kingcounty.gov/depts/finance-business-operations/procurement/for-business/Amazon-Pilot.aspx>
 - <https://kingcounty.gov/depts/finance-business-operations/procurement/for-business/Amazon-Pilot/Amazon-Get-Started.aspx>
3. Follow up Call in two weeks: I will work with Alex to schedule the next call Wednesday Sept 19th

-
-

Thank you again for your time Jonnel and I look forward to hearing back after you talk to OMB.

Kind Regards,

Jennifer

Millions of Products. Business Pricing. And Now, Supports Faster Reconciliation.

Amazon Business can provide you with enhanced transaction data on purchases made on eligible Visa Corporate Cards and Corporate Purchasing Cards.

Streamline Reconciliation

With enhanced transaction data you will receive additional line-item detail on purchases made on Amazon Business resulting in increased speed, visibility and accuracy of expense reconciliation. This will help ensure more efficient reporting and ultimately increased control over your organization's spending behavior. Whether you need to keep an eye on quantities, shipping costs, PO Numbers or taxes, this additional layer of data will provide the detail that you need to better manage your business.

Subject: Amazon: follow up and status (call requested)
Importance: High

Hello,

It's been a minute or two since we last connected. ☺ I wanted to give you both an update on our progress with OMB to create an Amazon Business account for NYC and also ask for your input on next steps. Let me know I can work with Alex to get a call scheduled next week to discuss.

Background:

- **Amazon Business** is a new marketplace for Government buyers that lives on top of Amazon.com -- combining the selection, convenience and value that customers have come to know and love from Amazon.com, with new features like tax exemption and lower pricing that can save tax dollars and address the needs of NYC public sector agencies.
- **Amazon M/WBE suppliers in NY:** Currently we have **more than 81,000 New York-based small and medium-sized businesses selling on Amazon**, many of which have self-identified with one or more quality or diversity ownership credentials. NYC agencies can refine their

product search to include offers based on different seller criteria, including minority-owned, women-owned, veteran-owned and small business.

Link to small business impact report: <https://www.aboutamazon.com/supporting-small-businesses/small-business-impact-report>

Amazon Business MICRO SPEND Project Scope (See attachment)

NYC has a mix of Amazon.com consumer accounts (2,800) and a handful of individual Amazon Business Accounts. There is an opportunity to drive savings by centralizing your existing Amazon.com users onto one master Amazon Business account and moving P-Card Micro spend to Amazon. This would also allow the NYC Agencies to purchase products from local NY suppliers with credential suppliers. There is an option to piggyback on our existing U.S. Communities Cooperative contract for Amazon Business (The City of LA recently leveraged this contract).

Looking forward to connecting with you soon!

Subject: Re: Connections

Hi Bridget,

Apologies for the slow response. I have been traveling. We are working to organize a multi-city E-waste pickup event on November 15th. We plan to use the Amazon Treasure Truck to (https://www.amazon.com/tt/webview/aboutus?ref=tt_d_np_lm) promote the event and will be working with a third-party company to conduct the e-waste collection and disposal. I am reaching out to ask for your assistance in finding the right location for this event. As you probably know, finding the right space for these events can be tricky. Do you have any ideas for spaces in New York City (Brooklyn or Manhattan) that could accommodate this event?

These are our basic parameters:

- 1) Must be within city limits
- 2) Must have enough square footage to accommodate a large-sized event with anticipation of filling at least 2 trucks per site (Most likely around 3,000 -4,000 sq ft)
 - a. Must also include around 1000 sq ft for Treasure Truck operations
- 3) Commercial space is preferred over residential
- 4) Easy entrance /exit that doesn't impede regular traffic flow outside of the parking lot

Thanks in advance for any advice you can provide. Of course, we will keep you in the loop as we continue to plan these events.

Best,

Subject: Amazon Raises Minimum Wage to \$15 for All U.S. Employees
Date: Tuesday, October 02, 2018 10:51:03 AM

Dear Emma,

I'm writing to share exciting news! Today, Amazon announced that we are increasing our minimum wage to \$15 for all full-time, part-time, temporary (including those hired by agencies), and seasonal employees across the U.S. effective November 1st. Additional details are in the press release below. Please let me know if you have any questions. Thank you.

Amazon Raises Minimum Wage to \$15 for All U.S. Employees, Including Full-Time, Part-Time, Temporary, and Seasonal

October 2, 2018 at 6:00 AM EDT

New \$15 minimum wage is effective beginning this November 1

New \$15 minimum wage includes associates employed by temp agencies

More than 250,000 Amazon employees, as well as more than 100,000 seasonal holiday employees, and their families will benefit from the new, higher pay

SEATTLE--(BUSINESS WIRE)--Oct. 2, 2018-- **NASDAQ:AMZN** — Amazon today announced it is increasing its minimum wage to \$15 for all full-time, part-time, temporary (including those hired by agencies), and seasonal employees across the U.S.—effective November 1. The new Amazon\$15 minimum wage will benefit more than 250,000 Amazon employees, as well as over 100,000 seasonal employees who will be hired at Amazon sites across the country this holiday.

“We listened to our critics, thought hard about what we wanted to do, and decided we want to lead,” said Jeff Bezos, Amazon Founder and CEO. “We’re excited about this change and encourage our competitors and other large employers to join us.”

Amazon’s public policy team will also begin advocating for an increase in the federal minimum wage.

“We will be working to gain Congressional support for an increase in the federal minimum wage. The current rate of \$7.25 was set nearly a decade ago,” said Jay

Carney, Senior Vice President of Amazon Global Corporate Affairs. “We intend to advocate for a minimum wage increase that will have a profound impact on the lives of tens of millions of people and families across this country.”

Employees will continue to receive Amazon’s industry-leading benefits, including:

- Comprehensive healthcare, including medical, dental, and vision coverage
- Company-paid life and disability insurance
- Up to 20 weeks of paid parental leave
- 401k matching
- Career Choice, which pre-pays 95% of associates’ tuition for courses in high-demand fields, whether those jobs are at Amazon or another company
- Career Skills, which trains hourly associates in critical job skills like resume writing, how to communicate effectively, and computer basics

With more than 575,000 employees worldwide, Amazon was named #1 on LinkedIn’s 2018 Top Companies list, ranks #1 on The Harris Poll’s Corporate Reputation survey, and #2 in Fortune’s World Most Admired Companies. To learn more about working at Amazon, click [here](#).

To find out more about the new Amazon\$15 minimum wage, [click here](#).

Subject: Amazon // NYC Center for Youth Employment Career Pass Site Visit
Date: Tuesday, October 02, 2018 3:45:54 PM
Attachments: [CareerPass Brochure.pdf](#)

Hi Sarah,

I hope you are well. My name is Devin and I am the Business Partnerships Manager of the NYC Center for Youth Employment at the Mayor's Fund. I'm reaching out because Amazon had previously expressed interest in participating in our CareerPass program, which brings a group of young people to your office to learn about the career paths available in tech.

I was wondering if you would be interested in participating sometime in 2019. I'm attaching the brochure for this program, but I would love to set up a call to discuss more details. Do you have any availability within the next two weeks? Next Wednesday works best for me, but let me know when works for you.

Hope to speak to you soon.

Best,

Devin

HOST A CAREERPASS VISIT AT YOUR BUSINESS

ABOUT THE NYC CENTER FOR YOUTH EMPLOYMENT

The Center for Youth Employment (CYE) pursues a simple but profoundly important mission: to dramatically expand and improve opportunities for young adults in NYC to gain work experiences, add skills, and explore potential career interests - all with an eye towards supporting the next generation of talent to power our local economy.

ABOUT CAREERPASS

CareerPass is a site visit program where businesses offer young people a tour of their workplace. CareerPass provides an invaluable opportunity for youth to get a sense of what it's like to work for some of the City's highest profile companies, gleaned directly from industry professionals. Participants come away with a better understanding of the organization's day-to-day business activities. These visits can inform their own decisions about possible future career paths, and what educational and work experiences they should pursue to fulfill their own ambitions.

WHY HOST A CAREERPASS VISIT?

This experience will give you an opportunity to bring more young people into your workplace and deepen engagement with young adults in your community, better understanding their interests, challenges and aspirations as potential workers or customers. Additionally, hosting a site visit is a light-touch, low-commitment way for you to initially connect with youth, and gauge staff and executive-level interest in additional activities, such as taking on interns.

Visit the NYC Center for Youth Employment at nyc.gov/cye

PLANNING YOUR CAREERPASS VISIT

STEP ONE: PREP MATERIALS

Before the visit, assemble resources and materials to share with the Center that will prepare youth for the tour, including background information on your organization (when founded, major lines of business, number of employees, etc.).

STEP TWO: TOUR AND DISCUSSION

On the day of the visit, lead the small group of youth through a tour of your workplace that gives them a sense of the daily activities of your business. Be sure that youth have opportunities to interact with staff working in various functions of your organization. Following the tour, arrange a panel or discussion with employees, ideally early career professionals. Be sure you leave time for questions.

STEP THREE: CONNECT WITH US

The Center and its partners offer many opportunities for employers to engage with youth beyond site visits. After your visit, consider other ways in which your organization might want to get involved, such as joining a mentoring program, partnering with a career and technical education high school, hosting interns, or participating in the CYE's industry networks.

FREQUENTLY ASKED QUESTIONS

How old are CareerPass participants?

CareerPass participants range in age from 14 to 24. CYE will work with you to make sure that your visit suits the needs of the participants.

When do CareerPass visits take place?

CareerPass visits can take place year-round. Typically visits are 2-4 hours and take place either during a morning breakfast session (10 a.m. start) or an afternoon lunch session (1 p.m. start).

What makes for a successful visit?

In our experience, the most successful visits include a mix of hands-on activities and interactive question and answer sessions. Additionally, sessions that give young people practical takeaways (i.e resume reviews, mock interviews) are extremely helpful. We welcome your ideas, too!

Hello,

I am writing to inquire about two orders:

ORDER # 113-4749717-6561008

ORDER # 113-4598756-1950615

We are a tax exempt organization and the approval did not go through until after these orders were placed. Is it possible to have tax credit reimbursed after the fact? And would this be from Amazon or should I contact the seller directly. It seems as though one of the orders was fulfilled by Amazon? Please let me know.

Thank you for your help!

Subject: Extra \$300 charge on project

Hello Sreenath,

We had a customer call in today regarding a possible double charge. She has two \$300 charges listed for 9/27/18 on her credit card bill. She filed one project with us (AF Holiday '18 Editorial, Project ID 26271). She is the only one who uses this particular credit card, and she stated that only one project was filed that week for her company... is there any way to look into this? I have the customer, Erin, cc'd on the email. Please let me know. Thank you!

Best,
Stephanie

Good Morning Heather,

Thank you for this information.

As of now attending the meeting with the Mayor will be:

- *Deputy Mayor Alicia Glen
- *Carolee Fink, Chief of Staff to DM Glen
- *James Patchett, President of EDC
- *Emma Wolfe, Chief of Staff to the Mayor

Gracie Mansion is located at East End Avenue at East 88th Street.
Upon arrival to Gracie Mansion all guests will announce themselves at the security booth; after that they will be escorted inside.

Let me know if we can confirm 2pm on Thursday, October 25th.

Many thanks,
Prisca

Good Morning Prisca,

I wanted to follow-up on securing a time and pass on a few updates and questions.

For your visibility, we'll have the following people attending from Amazon:

- Jeff Wilke, CEO, Worldwide Consumer
- Braden Cox, Director, US Public Policy
- Victor Bonett, Senior Manager, US Public Policy – Northeast

A few questions:

- Gracie Mansion sounds great – can you confirm we'll meet there?
- Any entry/arrival instructions?
- Is any specific identification required for entry?
- Anyone from the Mayor's staff joining the meeting?

Best,
Heather

Hi Sarah,

I hope you are well. My name is Devin and I am the Business Partnerships Manager of the NYC Center for Youth Employment at the Mayor's Fund. I'm reaching out because Amazon had previously expressed interest in participating in our CareerPass program, which brings a group of young people to your office to learn about the career paths available in tech.

I was wondering if you would be interested in participating sometime in 2019. I'm attaching the brochure for this program, but I would love to set up a call to discuss more details. Do you have any availability within the next two weeks? Next Wednesday works best for me, but let me know when works for you.

Hope to speak to you soon.

Best,

Devin

Date: Tuesday, October 30, 2018 10:59:00 AM

Hi Jed –

Apologies for the delayed follow up here. The goal of the Youth Leadership Council for NYC Open Data is to work with youth to identify ways for our program to engage a broader set of youth across the City. Whether that looks like stats training or needs identification at the local level is to be determined by the youth. If you have suggestions on ways to engage or if you / your team will be in NYC in the coming months and would like to be a guest speaker I'd be happy to coordinate having you speak to the youth about your work!

Hello! I really appreciate the introduction, Aileen!

This program sounds fantastic. I don't know if I have anything to add to it, but I'm curious to know if part of this effort is to provide teaching opportunities for youth to learn about statistics and how to apply them to real data. Is that part of the thinking here?

Also, you probably already know this, but Joe Flasher is the best.

Cheers,

Jed Sundwall

To: "Schmoeker, Adrienne" <ASchmoeker@analytics.nyc.gov>

Hello!

I'm reaching out as I believe that you may have connections to NYC high school youth (or connections to folks who work with youth!) – and I'd love to share a new opportunity we have for youth.

As you've likely heard from me in the past, [NYC Open Data](#) provides free access to more than 2,000 datasets from city agencies. We know that 30,000 users visit our platform on average per week – these are nonprofits, students, advocates, real estate companies, data journalists and others. We'd like to explore how **youth** could use NYC Open Data and are taking a human centered design approach to figuring out the best engagement approach by spinning up the first ever **Youth Leadership Council for NYC Open Data!**

Who is eligible? NYC youth enrolled in NYC high schools, aged 14-21
How do they engage? [Fill out this common application](#) and select "Mayor's Office of Data Analytics" as the Council the youth is interested in

What is the timing? We will accept applications throughout the year on a rolling basis but are hoping to wrap up recruitment by next Friday 11/02 with our first convening in late November / early December (date TBD) with monthly meetings going through June 2019

What is the commitment? We're asking the youth to commit to joining a 1.5 hour meeting once per month from November/December 2018 – June 2019, with optional opportunities to conduct additional work and research outside of the meetings. Meetings will likely take place in the Financial District of Manhattan but the venue is still being confirmed.

Please help us spread the word! I'm here if you have any questions – feel free to direct any interested youth (or their parents!) to me.

Thanks in advance for the support!

Adrienne

Date: Thursday, November 01, 2018 4:20:24 PM

Good Afternoon Emma and Mike,

Earlier today, Amazon announced [Amazon Future Engineer](#) (AFE), a new program that will become the key initiative in our efforts to promote STEM and computer science education, especially among underprivileged and underrepresented children and young adults throughout the country.

AFE is a comprehensive childhood-to-career program intended to empower, educate, and train 10 million students each year to pursue careers in the computer science field. What makes this program so unique is that Amazon will accompany AFE students through the entirety of their education journey – from elementary school, to high school, to college and beyond.

You can read the full details of the program on our blog:

<https://blog.aboutamazon.com/community/building-futures-in-computer-science>

And also within the press release: <https://press.aboutamazon.com/news-releases/news-release-details/amazon-launches-childhood-career-program-amazon-future-engineer>

If you'd like to help share the news on Twitter. Please use #STEM, tag [@AmazonNews](#) and feel free to link to our blog post: <https://blog.aboutamazon.com/community/building-futures-in-computer-science>

Feel free to follow up with any questions. Thanks!

Subject: Amazon announced we selected New York City for our new headquarters
Date: Tuesday, November 13, 2018 11:24:10 AM

Hello,

Congratulations! I'm sure you heard the good news this morning that New York City was chosen as one of the two the locations for our new headquarters. Amazon will invest \$5 billion and create more than 50,000 jobs across the two new headquarters locations, with more than 25,000 employees each in New York City and Arlington.

I'm interested to hear what you are hearing in your office with Mayor Bill de Blasio and his reaction to the good news. Let me know if we can re-engage and set up a call the first week of December.

THE CITY OF NEW YORK
OFFICE OF THE MAYOR
NEW YORK, NY 10007

FOR IMMEDIATE RELEASE: November 13, 2018
CONTACT: pressoffice@cityhall.nyc.gov, (212) 788-2958

**MAYOR DE BLASIO AND GOVERNOR CUOMO ANNOUNCE AMAZON
SELECTS LONG ISLAND CITY FOR NEW CORPORATE HEADQUARTERS**

*New campus represents the largest economic development project in New York State
history*

*Amazon will create 25,000 to 40,000 new jobs and invest more than \$3.6 billion over 15
years*

Mayor Bill de Blasio and Governor Andrew M. Cuomo today announced that Amazon, the world leader in e-commerce and cloud computing, will establish a new corporate headquarters in Long Island City, Queens. The decision followed a comprehensive, year-long selection process during which 238 cities across North America competed for the multibillion-dollar project.

In 2019, Amazon will occupy up to 500,000 square feet at One Court Square while working to construct four million square feet of commercial space on Long Island City's waterfront over the next 10 years, with expansion opportunities for up to 8 million square feet over the next 15 years. Through a \$3.6 billion total investment, Amazon will draw from the diverse and talented workforce in New York State to fill at least 25,000 new jobs by 2029 and up to 40,000 jobs by 2034 with an average salary of \$150,000. The construction is expected to create an average of 1300 direct construction jobs annually through 2033. Overall, the project is estimated to create more than 107,000 total direct and indirect jobs and over \$14 billion in new tax revenue for the State and a net of \$13.5 billion in City tax revenue.

"This is a giant step on our path to building an economy in New York City that leaves no one behind. We are thrilled that Amazon has selected New York City for its second headquarters," said **Mayor de Blasio**. "New Yorkers will get tens of thousands of new, good-paying jobs, and Amazon will get the best talent in the world. We're going to use this opportunity to open up good careers in tech to thousands of people looking for their foothold in the new economy, including those in City colleges and public housing. The City and State are working closely together to make sure Amazon's expansion is planned smartly, and to ensure this fast growing neighborhood has the transportation, schools and infrastructure it needs."

“When I took office, I said we would build a new New York State – one that is fiscally responsible and fosters a business climate that is attractive to growing companies and the industries of tomorrow. We’ve delivered on those promises and more, and today, with Amazon committing to expand its headquarters in Long Island City, New York can proudly say that we have attracted one of the largest, most competitive economic development investments in U.S. history,” **Governor Cuomo** said. “With an average salary of \$150,000 per year for 25,000 new jobs Amazon is creating in Queens, economic opportunity and investment will flourish for the entire region. Amazon understands that New York has everything the company needs to continue its growth. The State’s more than \$100 billion infrastructure program – the most ambitious in our history – combined with our education initiatives like K-12 tech education and the first-in-the-nation Excelsior Scholarship program, will help ensure long-term success and an unrivaled talent pool for Amazon.” Read the Memorandum of Understanding between the State, City and Amazon [here](#).

Last year, Amazon released a Request for Proposals to select one or more locations for additional headquarters operations in North America, leading to an unprecedented competition among more than 230 metropolitan areas. The joint New York City-New York State proposal focused on New York’s unparalleled talent and the capacity of its academic institutions, public schools and workforce training programs to fill the jobs Amazon will create at the pace the company’s rapid growth demands. New York State and New York City economic development officials collaborated to submit a robust response and have worked closely with Amazon over the past year on the winning proposal.

According to an economic impact study by REMI, Inc., a world leader in dynamic forecasting and policy analysis, the Amazon project will generate over \$186 billion in Gross State Product for the New York State economy over the initial 25 years. REMI also projects over \$14 billion in total new tax revenue for the State (in 2019 dollars), with annual revenues growing from \$10.8 million in 2019 to nearly \$1 billion in 2043. The City forecasts a net of \$13.5 billion in total new tax revenue.

"This is a huge win for New York" said **Deputy Mayor Alicia Glen**. "Amazon locating here demonstrates that New York City is now a global center for innovation and technology, drawn here by the amazing diversity of our workforce, our neighborhoods and our economy. Amazon's \$3.6 billion investment, as well as the investments it will make in job training, open space, education and infrastructure, will establish Long Island City as one of the region's most vibrant commercial districts."

"New York City is proud to be the new home of Amazon's second headquarters. We feel the same today as we did on day one of the company's national search: there is no city in North America better equipped for HQ2 than New York," said **NYCEDC President and CEO James Patchett**. "We have the best, brightest, and most diverse workforce, and are home to virtually every industry. From our leading academic intuitions to our celebrated diversity, which defines our rich history as a cultural melting pot, New York is unmatched in all we have to offer. We look forward to continuing working with our State partners, local elected officials and members of the community on ensuring Amazon's arrival in New York City will benefit everyone."

Empire State Development President, CEO & Commissioner Howard Zemsky said, "This is an enormous win for New York. Having supported all the cities in the state that

submitted proposals, we are extremely proud to have brought the largest deal in ESD history to New York State. This once-in-a-lifetime opportunity is a tribute to our world-class colleges and universities across the state, and most importantly it's a testament to our extraordinarily talented and diverse workforce. New York is a leader in so many disciplines and industries that align with Amazon's business – including digital media, film production, merchandising, fashion, advertising, ag and food processing, fintech and many more. With a shared history of innovation, New York and Amazon will grow faster and smarter, together."

The City-State agreement with Amazon includes commitments to build a jointly-funded 10,000 square-foot onsite employment center to connect local residents with jobs and training. A \$15 million investment will expand the JobsPlus program to Queensbridge Houses and expand tuition-free tech training to its residents—serving nearly 1,800 residents over the next 10 years.

The agreement also secures a new approximately 600-seat intermediate public school, a 3.5-acre waterfront esplanade and park, and the establishment of a Long Island City Infrastructure Fund to invest 50 percent of the project's PILOT proceeds to deliver on transportation and other neighborhood priorities that will be identified in collaboration with the local community.

To bring this transformational, multibillion-dollar project to New York, the State offered a package of performance-based incentives totaling \$1.705 billion, including a \$505 million capital grant and \$1.2 billion in tax credits through the Excelsior Jobs Program – both of which are directly tied to Amazon's commitment to invest \$3.6 billion and create up to 40,000 new jobs. Additionally, the company, State and City are committing \$15 million – \$5 million each – to create new workforce development programs focused on technology training and recruitment specific to New York City and targeted toward underrepresented segments of the workforce. Programs supported by this initiative may include community-based accelerated technology training programs, internships, and work-based learning opportunities for high school students. Under pre-existing as-of-right programs authorized by law, Amazon is eligible for a partial property tax abatement through ICAP and an annual credit of \$3,000 for twelve years per eligible employee under REAP, a program available to all companies to encourage job growth outside of Manhattan. REAP benefits for Amazon's 10-year expansion are projected at \$897 million through 2038, and ICAP will abate approximately \$386 million.

"The number one thing we can do for New Yorkers at every rung of the economic ladder is create jobs, and the number one way to do that is to bring companies like Amazon to New York," said **U.S. Senator Charles E. Schumer**. "So, this a great opportunity to help New Yorkers at every income level, but we must make sure there are commensurate infrastructure and housing improvements to the neighborhoods to which Amazon is moving, and make sure community residents are hired when Amazon lands. I commend New York City and State for working together to get this positive result, and I look forward to working with Mayor de Blasio, Governor Cuomo and Amazon to tackle these challenges."

"Long Island City - New York's emerging tech hub - is 'primed' for Amazon. Amazon is a timely fit for the borough, given the Tech Plan we commissioned years ago funded by Governor Cuomo to create the city's leading tech ecosystem, coupled with Mayor de Blasio's \$180 million in new investments for infrastructure improvements unveiled several weeks ago for schools, transportation and open space. With its organic growth, wealth of local talent and inherent global assets to foster innovation, Queens offers a dynamic mixed-use community

where workers can live, ideas can synergize, and businesses can flourish. New companies should take note, however, that New York is a union town. I have full faith that the City and State will be able to resolve all outstanding issues including organized labor, infrastructure and capacity concerns," said **Queens Borough President Melinkda Katz**.

"Long Island City has been the beating heart of New York City since the modern city began at the turn of the last century. With this announcement, our community is again poised to be the most successful mixed-use neighborhood in New York" said **Assemblywoman Catherine Nolan**. "Talented residents new and long standing; skilled artists, artisans and activists, inventors and idealists, all call LIC home. They come from all over the world; from New York's backyards and public housing, because they know New York City has the resources, the will and the drive for all to succeed and have a good life for themselves and their families. All are believers in New York as a beacon of excellence, equity and freedom. Long Island City Queens is the neighborhood of the fulfillment of their dreams, and this project can be another step in that future. I look forward to working on the success of this effort."

Long Island City is one of the fastest-growing neighborhoods in the five boroughs. To meet the needs that come with new residents and new jobs, the City has steadily increased its investment in the area's infrastructure. All told, there is more than \$2.4 billion of planned infrastructure investments across the neighborhood, including a \$180 million investment that was recently announced by the City for new schools, open space and transportation.

The State and City will collaborate with the company and local community to conduct an environmental review and develop a General Project Plan, as is typically done for large City-State development projects, including nearby Queens West. A Community Advisory Committee will be established, which will include representatives of the State, City and local elected officials. In addition, longtime community developer Plaxall will advance development on adjoining waterfront sites that will include planning that complements Amazon's new headquarters.

Amazon has already made several key investments in New York City. The company has a sizable presence throughout the five boroughs, including existing corporate offices, a distribution and fulfillment center on Staten Island, and retail space in SoHo. Earlier this year, Amazon signed a lease for 360,000 square feet of commercial office space on the far West Side of Manhattan. In addition, Amazon recently purchased the 83,000-square-foot building in Woodside to develop a second fulfillment center, substantially expanding its New York City footprint and creating over 2,000 jobs.

Hey Adam,

Apologies for the delay. Below is a quote from NYC Mayor Bill de Blasio. Also, just want to flag that the quote and our release will say “up to 40k jobs over 15 years” as detailed in the MOU. I understand it won’t be specified as such in your release or remarks, but since it will be in the joint City and State release, it’s likely to come up tomorrow.

“This is a giant step on our path to building and economy in New York City that leaves no one behind. We are thrilled that Amazon has selected New York City for its second headquarters. New Yorkers will get 40,000 new, good-paying jobs,

and Amazon will get the best talent anywhere in the world. We're going to use this opportunity to open up good careers in tech to thousands of people looking for their foothold in the new economy, including those in City colleges and public housing. The City and State are working closely together to make sure Amazon's expansion is planned smartly, and to ensure this fast growing neighborhood has the transportation, schools and infrastructure it needs," **said New York City Mayor Bill de Blasio.**

MAYOR DE BLASIO AND GOVERNOR CUOMO ANNOUNCE AMAZON SELECTS LONG ISLAND CITY FOR NEW CORPORATE HEADQUARTERS

New campus represents the largest economic development project in New York State history

Amazon will create 25,000 to 40,000 new jobs and invest more than \$3.6 billion over 15 years

NEW YORK – Mayor Bill de Blasio and Governor Andrew M. Cuomo today announced that Amazon, the world leader in e-commerce and cloud computing, will establish a new corporate headquarters in Long Island City, Queens. The decision followed a comprehensive, year-long selection process during which 238 cities across North America competed for the multibillion-dollar project.

In 2019, Amazon will occupy up to 500,000 square feet at One Court Square while working to construct four million square feet of commercial space on Long Island City's waterfront over the next 10 years, with expansion opportunities for up to 8 million square feet over the next 15 years. Through a \$3.6 billion total investment, Amazon will draw from the diverse and talented workforce in New York State to fill at least 25,000 new jobs by 2029 and up to 40,000 jobs by 2034 with an average salary of \$150,000. The construction is expected to create an average of 1300 direct construction jobs annually through 2033. Overall, the project is estimated to create more than 107,000 total direct and indirect jobs and over \$14 billion in new tax revenue for the State and a net of \$13.5 billion in City tax revenue. The project provides a 9:1 return on investment.

"This is a giant step on our path to building an economy in New York City that leaves no one behind. We are thrilled that Amazon has selected New York City for its new headquarters," said **Mayor de Blasio**. "New Yorkers will get tens of thousands of new, good-paying jobs, and Amazon will get the best talent in the world. We're going to use this opportunity to open up good careers in tech to thousands of people looking for their foothold in the new economy, including those in City colleges and public housing. The City and State are working closely together to make sure Amazon's expansion is planned smartly, and to ensure this fast growing neighborhood has the transportation, schools and infrastructure it needs."

"When I took office, I said we would build a new New York State – one that is fiscally responsible and fosters a business climate that is attractive to growing companies and the industries of tomorrow. We've delivered on those promises and more, and today, with Amazon committing to expand its headquarters in Long Island City, New York can proudly say that we have attracted one of the largest, most competitive economic development investments in U.S. history," **Governor Cuomo** said. "With an average salary of \$150,000 per year for 25,000 new jobs Amazon is creating in Queens, economic opportunity and investment will flourish for the entire region. Amazon understands that New York has everything the company needs to continue its growth. The State's more than \$100 billion infrastructure program – the most ambitious in our history – combined with our education initiatives like K-12 tech education and the first-in-the-nation Excelsior Scholarship program, will help ensure long-term success and an unrivaled talent pool for Amazon."

Read the Memorandum of Understanding between the State, City and Amazon [here](#).

Last year, Amazon released a Request for Proposals to select one or more locations for additional headquarters operations in North America, leading to an unprecedented competition among more than 230 metropolitan areas. The joint New York City-New York State proposal focused on New York's unparalleled talent and the capacity of its academic institutions, public schools and workforce training programs to fill the jobs Amazon will create at the pace the company's rapid growth demands. New York State and New York City economic development officials collaborated to submit a robust response and have worked closely with Amazon over the past year on the winning proposal.

According to an economic impact study by REMI, Inc., a world leader in dynamic forecasting and policy analysis, the Amazon project will generate over \$186 billion in Gross State Product for the New York State

economy over the initial 25 years. REMI also projects over \$14 billion in total new tax revenue for the State (in 2019 dollars), with annual revenues growing from \$10.8 million in 2019 to nearly \$1 billion in 2043. The City forecasts a net of \$13.5 billion in total new tax revenue.

"This is a huge win for New York" said **Deputy Mayor Alicia Glen**. "Amazon locating here demonstrates that New York City is now a global center for innovation and technology, drawn here by the amazing diversity of our workforce, our neighborhoods and our economy. Amazon's \$3.6 billion investment, as well as the investments it will make in job training, open space, education and infrastructure, will establish Long Island City as one of the region's most vibrant commercial districts."

"New York City is proud to be the new home of Amazon's second headquarters. We feel the same today as we did on day one of the company's national search: there is no city in North America better equipped for HQ2 than New York," said **NYCEDC President and CEO James Patchett**. "We have the best, brightest, and most diverse workforce, and are home to virtually every industry. From our leading academic intuitions to our celebrated diversity, which defines our rich history as a cultural melting pot, New York is unmatched in all we have to offer. We look forward to continuing working with our State partners, local elected officials and members of the community on ensuring Amazon's arrival in New York City will benefit everyone."

Empire State Development President, CEO & Commissioner Howard Zemsky said, "This is an enormous win for New York. Having supported all the cities in the state that submitted proposals, we are extremely proud to have brought the largest deal in ESD history to New York State. This once-in-a-lifetime opportunity is a tribute to our world-class colleges and universities across the state, and most importantly it's a testament to our extraordinarily talented and diverse workforce. New York is a leader in so many disciplines and industries that align with Amazon's business – including digital media, film production, merchandising, fashion, advertising, ag and food processing, fintech and many more. With a shared history of innovation, New York and Amazon will grow faster and smarter, together."

The City-State agreement with Amazon includes commitments to build a jointly-funded 10,000 square-foot onsite employment center to connect local residents with jobs and training. A \$15 million investment will expand the JobsPlus program to Queensbridge Houses and expand tuition-free tech training to its residents—serving nearly 1,800 residents over the next 10 years.

The agreement also secures a new approximately 600-seat intermediate public school, a 3.5-acre waterfront esplanade and park, and the establishment of a Long Island City Infrastructure Fund to invest 50 percent of the project's PILOT proceeds to deliver on transportation and other neighborhood priorities that will be identified in collaboration with the local community.

To bring this transformational, multibillion-dollar project to New York, the State offered a package of performance-based incentives totaling \$1.705 billion, including a \$505 million capital grant and \$1.2 billion in tax credits through the Excelsior Jobs Program – both of which are directly tied to Amazon's commitment to invest \$3.6 billion and create up to 40,000 new jobs.

Additionally, the company, State and City are committing \$15 million – \$5 million each – to create new workforce development programs focused on technology training and recruitment specific to New York City and targeted toward underrepresented segments of the workforce. Programs supported by this initiative may include community-based accelerated technology training programs, internships, and work-based learning opportunities for high school students. Under pre-existing as-of-right programs authorized by law, Amazon is eligible for a partial property tax abatement through ICAP and an annual credit of \$3,000 for twelve years per eligible employee under REAP, a program available to all companies to encourage job growth outside of Manhattan. REAP benefits for Amazon's 10-year expansion are projected at \$897 million through 2038, and ICAP will abate approximately \$386 million.

"The number one thing we can do for New Yorkers at every rung of the economic ladder is create jobs, and the number one way to do that is to bring companies like Amazon to New York," said **U.S. Senator Charles E. Schumer**. "So, this a great opportunity to help New Yorkers at every income level, but we must make sure there are commensurate infrastructure and housing improvements to the neighborhoods to which Amazon is moving, and make sure community residents are hired when Amazon lands. I commend New York City and State for working together to get this positive result, and I look forward to working with Mayor de Blasio, Governor Cuomo and Amazon to tackle these challenges."

"Long Island City - New York's emerging tech hub - is 'primed' for Amazon. Amazon is a timely fit for the borough, given the Tech Plan we commissioned years ago funded by Governor Cuomo to create the city's leading tech ecosystem, coupled with Mayor de Blasio's \$180 million in new investments for infrastructure

improvements unveiled several weeks ago for schools, transportation and open space. With its organic growth, wealth of local talent and inherent global assets to foster innovation, Queens offers a dynamic mixed-use community where workers can live, ideas can synergize, and businesses can flourish. New companies should take note, however, that New York is a union town. I have full faith that the City and State will be able to resolve all outstanding issues including organized labor, infrastructure and capacity concerns," said **Queens Borough President Melinda Katz**.

"Long Island City has been the beating heart of New York City since the modern city began at the turn of the last century. With this announcement, our community is again poised to be the most successful mixed-use neighborhood in New York" said **Assemblywoman Catherine Nolan**. "Talented residents new and long standing; skilled artists, artisans and activists, inventors and idealists, all call LIC home. They come from all over the world; from New York's backyards and public housing, because they know New York City has the resources, the will and the drive for all to succeed and have a good life for themselves and their families. All are believers in New York as a beacon of excellence, equity and freedom. Long Island City Queens is the neighborhood of the fulfillment of their dreams, and this project can be another step in that future. I look forward to working on the success of this effort."

"It's exciting that Amazon is making this commitment to our great city and state," said **Gary LaBarbera, president of the Building and Construction Trades Council of Greater New York**. "We look forward to working closely with Amazon and the community to ensure that the project includes good middle class construction jobs with benefits and high quality permanent jobs."

Long Island City is one of the fastest-growing neighborhoods in the five boroughs. To meet the needs that come with new residents and new jobs, the City has steadily increased its investment in the area's infrastructure. All told, there is more than \$2.4 billion of planned infrastructure investments across the neighborhood, including a \$180 million investment that was recently announced by the City for new schools, open space and transportation.

The State and City will collaborate with the company and local community to conduct an environmental review and develop a General Project Plan, as is typically done for large City-State development projects, including nearby Queens West. A Community Advisory Committee will be established, which will include representatives of the State, City and local elected officials. In addition, longtime community developer Plaxall will advance development on adjoining waterfront sites that will include planning that complements Amazon's new headquarters.

Amazon has already made several key investments in New York City. The company has a sizable presence throughout the five boroughs, including existing corporate offices, a distribution and fulfillment center on Staten Island, and retail space in SoHo. Earlier this year, Amazon signed a lease for 360,000 square feet of commercial office space on the far West Side of Manhattan. In addition, Amazon recently purchased the 83,000-square-foot building in Woodside to develop a second fulfillment center, substantially expanding its New York City footprint and creating over 2,000 jobs.
